Observational Field Visits Report - 2023-24

1. Water Purification Site and Water Quality Tests

Observations:

Site Overview: Visited RMCH water purification plant.

Processes Observed: Coagulation, sedimentation, filtration, and disinfection.

Water Quality Tests: Tested for pH, turbidity, chlorine levels, microbial contaminants, and heavy metals.

Key Insights: Ensured water safety and compliance with health standards. Emphasis on regular testing and maintenance.

2. Milk Dairy

Observations:

Site Overview: Visited Parag Milk Dairy farm processing plant.

Processes Observed: Milking, pasteurization, homogenization, and packaging.

Quality Control: Regular microbial testing, temperature control, and sanitation practices.

Key Insights: Importance of hygiene in preventing contamination and ensuring safe dairy products.

3. Sewage Disposal and Treatment Site

Observations:

Site Overview: Visited RMCH sewage treatment plant.

Processes Observed: Primary, secondary, and tertiary treatment stages.

Quality Control: Monitoring effluent quality, sludge management, and odor control.

Key Insights: Effective sewage treatment is crucial for public health and environmental protection.

4. Old Age Homes

Observations:

Site Overview: Visited Kashidham Vridh Ashram Old Age Home and Kushth Ashram (Leprosy Centre).

Facilities Observed: Living quarters, dining area, medical facilities, and recreational areas.

Care Practices: Regular health check-ups, medication management, physiotherapy, and social activities.

Key Insights: Importance of comprehensive care and emotional support for elderly residents.

5. Industries

Observations:

Site Overview: Visited Brindavan Beverages (Coca-Cola).

Processes Observed: Production line, quality control, and waste management.

Health and Safety: Workplace safety measures, emergency protocols, and PPE usage.

Key Insights: Industrial hygiene practices are vital for worker safety and product quality.

6. Schools

Observations:

Site Overview: Visited Disha Higher Secondary School.

Facilities Observed: Classrooms, laboratories, playgrounds, and therapy

Health Practices: Vaccination programs, hygiene education, and first aid facilities.

Key Insights: A healthy school environment supports student well-being and academic performance.

7. Rehabilitation Centre

Observations:

Site Overview: Visited Jeevan Dhara College of Special Studies and Rehabilitation, Pream Nivas (Mental Illness), and Nivan Drug Rehabilitation Center.

Facilities Observed: Therapy rooms, Yoga & medication areas, and counseling offices.

Care Practices: Individualized treatment plans, daily routine works, special training, care mental illness patient, medication, physical therapy, counseling therapy, occupational therapy, and mental health counseling.

Key Insights: An integrated approach is essential for effective rehabilitation and recovery.

Summary

These field visits provided valuable insights into diverse health and safety practices across different sectors. Emphasizing hygiene, regular monitoring, and comprehensive care ensures optimal outcomes in water quality, dairy safety, sewage treatment, elderly care, industrial safety, educational environments, and rehabilitation services.
