1.3.4 ***Students undertake field visits / research projects / Industry internship / visits/ Community postings as part of curriculum enrichment.***

Response:

Introduction

Professional courses training programs offered by Bareilly International University, Bareilly aim at equipping students with skills necessary for working at the ground level with the patients in the community. Curriculum is enriched by incorporating field visits, research projects, community settings, and industry interfaces.

Field visits :

Field visits increase students' learning through active hands-on experience which in turn gives a boost to the student's knowledge and understanding of a subject. Field visits are mandatory curricular activities.

To make students aware of real field situations and practical issues of certain topics, community medicine department arranges regular visits of the students. The places to be visited may differ depending upon vehicle availability, student strength, distance of the place from medical college, administrative issues, etc. Usually, places where students realize the practical importance of theoretical aspects, which can affect or which do affect health of public or community directly, are visited on a priority. Medical and nursing students undertake field visits to healthcare delivery centers, PHC, dairy milk units, sewage treatment plants, water treatment plants, and public health laboratory. It helps in familiarizing them with prevention of disease, practical insight, actual implementation of national health programs, and enhances their knowledge and skills.

Research Projects

All programs have a built in research component. Students of various UG/PG programs are offered with research skills through minor research projects. The university is able to attract many sponsored research projects including clinical trials and encourages students to take up research projects that are sponsored by WHO, ICMR or the STS funded by the institute. Project work and thesis submission are part of all the postgraduate programmes, and Ph.Ds.

Industrial visit:

Visits to different government/private industries are organized to experience the real working equipment/operations to bridge the gap between academics and industries.

The meticulous planning of learning experiences for students in real life settings of hospital, home, community and industry forms the core for curricular implementation. The students

learn through observation, reflection, work-place based learning under supervision during their clinical rotations, clerkships and internships. Valuable links with community agencies enhance social preparedness and foster a sense of **Institutional Social Responsibility** and people-friendly attitude to students. Industrial visits give opportunity for students to conduct individual/group projects and practical work enhancing the students' creativity, decision making and problem-solving skills.

Internship: Internship is an inbuilt feature for UG programs for acquisition of the desired skills. The students are actively involved in treating the patients under supervision. Students maintain logbooks containing skills to be achieved and reflect upon their experiences in field, industry, and community visits and postings.

Community Postings: Students are posted in community settings. They do health check-up and maintain family health folders. They learn social, economic, environmental aspects of health and disease in a family setup. There is a defined rural postings rule for RHTC Rithora, Govt. PHC, and urban postings at UHTC Rampur Garden, Bareilly.

Rohilkhand Medical College & Hospital
Pilibhit By-Pas Road, Bareilly (U.P)

Ref. No.: RMCH/ ITP/ 11 /2025

Date: 15.03.2025

The Internship Training Programme will start w.e.f.15.03.2025 The batch wise and subject wise distribution is as under:-

Internship Training Programme

Duration of Postings	Group 1 (13 weeks)	Group 2 (13 weeks)	Group 3 (13 weeks)	Group 4 (13 weeks)
1st to 13th week **(15.03.2025 to 13.06.2025)**	A	B	C	D
14th week to 26th week **(14.06.2025 to 12.09.2025)**	B	A	D	C
27th week to 39th week **(13.09.2025 to 12.12.2025)**	C	D	A	B
40st week to 52nd week **(13.12.2025 to 14.03.2026)**	D	C	B	A

Note:-

1) In group 1, following postings are covered Community Medicine + Ayurveda. Interns posted in Community Medicine will be rotated to Ayurveda for 01 Week by HOD Community Medicine.
2) In group 2, following postings are covered Gen. Medicine, Gen. Surgery and Respiratory Medicine. Interns posted in Gen. Medicine will be rotated to Respiratory Medicine for 01 week by HOD Gen. Medicine.
3) In group 3, following postings are covered Psychiatry, Paediatrics, Ophthalmology, Casualty, Orthopaedics and ENT.
4) In group 4, following postings are covered Obst & Gynecology, Anaesthesia, Forensic Medicine, Dermatology, Radiology and Lab medicine.

Distribution of Batches for starting of Internship of MBBS 2025 (List of Interns attached)

Batch 'A'- Int 25 A / 01to24, Batch 'B' - Int 25 A /25 to 48,Batch 'C'- Int 25 A /49 to72 , Batch 'D' - Int 25 A /73 to 96

I/c Internship Training Programme

Rohilkhand Medical College & Hospital
Pilibhit By-Pas Road, Bareilly (U.P)

Ref. No.: RMCH/ ITP/ 110 /2021

Date: 01.09.2021

The Internship Training Programme will start w.e.f. 01.09.2021. The batch wise and subject wise distribution is as under:-

Internship Training Programme

Duration of Postings	Medicine & Psychiatry 2 months	Surgery & Anaesthesia 2 months	OBG 2 months	Community Medicine 2 months	Pediatrics & Orthopaedics 2months (1 month each)	ENT, EYE, Casualty, Elec. 2 months (15 days each)
01 September 2021 to 31 October, 2021	A	B	C	D	E	F
01 November 2021 to 30 December 2021	F	A	B	C	D	E
31 December 2021 to 28 February 2022	E	F	A	B	C	D
01 March 2022 to 30 April 2022	D	E	F	A	B	C
01 May 2021 to 30 June 2022	C	D	E	F	A	B
01 July 2022 to 31 August 2022	B	C	D	E	F	A

Note:-

1) Interns posted in Medicine will be rotated to Psychiatry for 15 days by HOD Medicine.
2) Interns posted in Surgery will be rotated to Anaesthesia for 15 days by HOD Surgery.
3) Interns posted in Paediatrics will be rotated to Ortho for 1 month by HOD Paediatrics.
4) Interns posted in ENT will be rotated to Ophthalmology, Casualty and Elective for 15 days each by HOD ENT.
5) Elective: - Dermatology & STD, Tuberculosis & Respiratory Disease, Radio-diagnosis, Forensic Medicine, Psychiatry, Blood Bank.
6) **All the HODs are requested to allow joining to those interns, who submit hostel undertaking in the office of undersigned.**

Distribution of Batches for starting of Internship of MBBS 2016 Supple Batch (List of Interns attached)

Batch 'A'- S. No. 01 to 05, Batch 'B'- S. No. 06 to 10, Batch 'C'- S. No. 11 to 15 , Batch 'D'- S. No. 16 to 19, Batch 'E'- S. No. 20 to 23, Batch 'F'- S. No 24 to 27.

Copy to:

1. Principal, RMCH, Bareilly, for information please:
2. Medical Superintendent, RMCH, Bareilly for information please.
3. HOD, Concern Departments, RMCH, Bareilly for information & necessary action please.
4. A.O. (Dr. Faiz Shamsi), RMCH, Bareilly
5. Office Superintendent, Establishment Section, RMCH, Bareilly for record purpose.
6. Account Officer (Admin Block), RMCH, Bareilly

FIELD VISITS, RESEARCH PROJECTS, INDUSTRY INTERNSHIPS AND COMMUNITY POSTINGS AS PART OF CURRICULUM ENRICHMENT POLICY

1. Objective

The objective of this policy is to establish guidelines for incorporating field visits, research projects, industry internships, and community postings as essential components of the curriculum at the Private Medical University. These activities are intended to provide students with practical exposure to real-world healthcare settings, enhance their research capabilities, bridge the gap between theory and practice, and foster a deeper understanding of the healthcare system and its social implications.

2. Scope

This policy applies to all undergraduate, postgraduate, and continuing education programs within the medical faculty. It governs all student involvement in field visits, internships, research projects, and community postings that are integrated into the curriculum. These experiences are designed to complement academic learning and contribute to the holistic development of students.

3. Types of Curriculum Enrichment Activities

- **Field Visits:**
  - Field visits provide students with opportunities to observe healthcare practices in diverse environments such as hospitals, clinics, public health settings, and research institutions. These visits are designed to expose students to different healthcare delivery models, patient care practices, and public health interventions.
- **Research Projects:**
  - Students are encouraged to undertake research projects that contribute to the advancement of medical science, healthcare practices, or public health. These projects can be either independent or in collaboration with faculty, industry partners, or research institutions, and may focus on clinical studies, medical innovations, health policy, or social determinants of health.
- **Industry Internships:**
  - Industry internships offer students practical experience in medical-related industries, such as pharmaceutical companies, medical device manufacturers, biotechnology firms, and healthcare IT companies. These internships enable students to gain insight into the application of medical knowledge in the industry and understand the role of innovation in healthcare.
- **Community Postings:**
  - Community postings involve students working in local communities, particularly in underserved or rural areas, to engage in public health campaigns, preventive care programs, or health education initiatives. These postings allow students to address health inequities and gain hands-on experience in community health interventions.

4. Objectives of Curriculum Enrichment Activities

- **Application of Knowledge:**
  - Allow students to apply theoretical knowledge to real-world healthcare scenarios, enhancing their clinical, research, and problem-solving skills.
- **Exposure to Diverse Healthcare Environments:**
  - Provide students with exposure to various healthcare settings, including hospitals, primary care centers, research labs, community health organizations, and industries, to foster a broad understanding of the healthcare ecosystem.
- **Skill Development:**

- Develop critical skills such as communication, teamwork, leadership, and adaptability through hands-on experience in diverse settings.

- **Research and Innovation:**
  - Encourage a culture of inquiry and innovation by engaging students in research activities that contribute to advancements in medical science and healthcare practices.
- **Social Responsibility and Community Engagement:**
  - Foster a sense of social responsibility by involving students in projects that aim to address health inequities, improve public health, and promote health education in communities.
- **Professional Development:**
  - Equip students with the necessary skills to excel in their future professional roles, whether in clinical practice, healthcare management, research, or industry.

5. Guidelines for Organizing Field Visits, Research Projects, Industry Internships, and Community Postings

- **Approval and Coordination:**
  - All field visits, research projects, internships, and community postings must be approved by the relevant academic or departmental authorities, and they should be aligned with the curriculum.
  - The university will collaborate with hospitals, clinics, research centers, industries, and community organizations to establish partnerships and facilitate these activities.
- **Preparation and Orientation:**
  - Students must undergo an orientation session before participating in any of these activities. This orientation should cover the objectives of the activity, expected outcomes, safety protocols, ethical considerations, and professional conduct.
- **Supervision and Mentorship:**
  - Each student undertaking a field visit, internship, or research project should be assigned a supervisor or mentor who will provide guidance, monitor progress, and ensure the student's work adheres to academic and professional standards.
- **Assessment:**
  - Students will be assessed based on their performance during the field visit, research project, or internship. Assessment methods may include written reports, presentations, supervisor evaluations, and reflective journals.
  - The evaluation will focus on students' ability to apply theoretical knowledge, demonstrate critical thinking, engage with patients or the community, and communicate findings or results effectively.
- **Duration and Timing:**
  - The duration of field visits, internships, and community postings will vary depending on the nature of the activity. Typically, internships and field visits may last anywhere from a few days to several weeks, while research projects may extend throughout a semester or academic year.
  - These activities will be scheduled in accordance with the academic calendar to ensure they align with the students' academic workload.

6. Faculty and Institutional Support

- **Faculty Involvement:**
  - Faculty members should be actively involved in overseeing and mentoring students during their research projects, internships, and field visits, ensuring that the students gain meaningful experiences and outcomes from these activities.
  - Faculty should also support students in identifying and securing appropriate placements for internships and field visits.
- **Institutional Partnerships:**

- The university will establish and maintain partnerships with hospitals, clinics, healthcare providers, research organizations, industry partners, and community outreach programs to provide students with diverse and relevant field visit, research, and internship opportunities.
- These partnerships will be governed by formal agreements that define the roles, expectations, and responsibilities of both the university and the external organizations.

7. Health and Safety Considerations

- **Health and Safety Protocols:**
  - The university will ensure that all field visits, internships, and community postings adhere to health and safety standards to protect students and patients.
  - Students must be informed of any potential risks involved in the activity, and appropriate measures will be taken to mitigate these risks.
- **Insurance and Liability:**
  - The university will provide students with adequate insurance coverage for any field visits, internships, or research projects that involve direct interaction with patients, healthcare settings, or industry environments.
  - Students must comply with all institutional policies regarding health and safety while participating in these activities.

8. Documentation and Reporting

- **Documentation Requirements:**
  - Students are required to submit regular progress reports, case studies, and final reports based on their field visits, research projects, and internships. These reports should include reflective components that address their learning outcomes and personal growth during the activity.
- **Feedback Mechanism:**
  - Feedback from mentors, supervisors, and community partners will be collected to assess the effectiveness of the field visits, research projects, and internships. This feedback will be used to improve future placements and ensure high-quality experiences for students.

9. Conclusion

By incorporating field visits, research projects, industry internships, and community postings into the medical curriculum, the Private Medical University aims to provide students with a comprehensive, real-world education. These activities will not only enhance students' technical and clinical skills but also foster social responsibility, critical thinking, and professional ethics, ensuring they are well-prepared to meet the challenges of modern healthcare.

FIELD VIS

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) INDIA
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 07/01/2025

Name of Event: Field Visits On Family Adoption Program

Date: 06/01/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Introduction & Rapport Building

- Introduction to the family and explanation of the purpose of the visit.
- Establishing rapport and gaining trust for effective communication.
- Building basic interpersonal and communication skills.

2. Socio-Demographic Data Collection

- Recording family members' details (name, age, sex, education, occupation).
- Understanding family structure: nuclear/joint/three-generation.
- Assessing economic status using tools like Modified B.G. Prasad scale.

3. Environmental Survey

Observation of:

- Type of house (kutcha/pucca/semi-pucca).
- Water supply and storage.
- Waste disposal methods (solid and liquid).
- Ventilation and lighting.
- Presence of vectors (mosquitoes/flies).

OUTCOMES

1. Understanding of Social Determinants of Health

- Recognize how factors like income, education, occupation, environment, and culture impact health.
- Appreciate the relationship between living conditions and disease patterns.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) INDIA
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

2. Application of Epidemiological Skills

- Develop skills in history taking, data collection, and analysis.
- Understand the distribution and determinants of health in a family/community context.

3. Enhancement of Communication Skills

- Learn to communicate effectively with individuals and families across socio-cultural backgrounds.
- Build trust and rapport for meaningful health education and interactions.

4. Exposure to Health Systems and Services

- Observe how public health services (ASHA, ANM, PHC, CHC) function at the grassroots level.
- Understand referral pathways and health program implementation at the community level.

DATE: 13/01/2025

Name of Event: Field Visits On Family Adoption Program

Date: 11/01/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Environmental Survey

- Observation of:
  - Type of house (kutcha/pucca/semi-pucca).
  - Water supply and storage.
  - Waste disposal methods (solid and liquid).
  - Ventilation and lighting.
  - Presence of vectors (mosquitoes/flies).

2.Health Status & Medical History

- Inquiring about any known illnesses in family members (especially chronic diseases).
- Immunization status of children.
- History of recent hospital visits or treatments.
- Awareness about local health facilities.

3. Nutritional Assessment

- Observing food storage and cooking practices.
- Basic dietary pattern of the family.
- Identifying signs of undernutrition or malnutrition (in children especially).

OUTCOMES

1. Development of Clinical and Observational Skills

- Practice basic clinical examinations: vital signs, nutritional assessment, etc.
- Identify common illnesses and risk factors in the community.

DATE: 16/01/2025

Name of Event: Field Visits On Family Adoption Program

Date: 15/01/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Health Education

- Educating the family (based on observations) about:
  - Hand hygiene and personal cleanliness.
  - Importance of safe drinking water and sanitation.
  - Nutrition for children and pregnant women.
  - Immunization and family planning (if appropriate).

2.Maintenance of Records

- Filling out Family Folder/Proforma.
- Documenting findings in a structured manner (often guided by the department).
- Reflective learning entries (some colleges require journal notes).

3.Faculty Debrief & Discussion

- Presentation of findings during small group discussions.
- Learning from peers' experiences.
- Getting feedback from faculty for improvement.

OUTCOMES

1.Preparation for Preventive and Promotive Healthcare

- Develop a preventive approach toward healthcare rather than a curative one.
- Realize the importance of early detection and health promotion.

2. Teamwork and Collaboration

- Learn to work in groups with fellow students and community health workers.
- Practice planning, organizing, and reporting as a team.

DATE: 03/02/2025

Name of Event: Field Visits On Family Adoption Program

Date: 01/02/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Family Profiling

- **Household identification** (name, address)
- Socio-demographic details of all family members
- Educational, occupational, and economic status
- Caste/religion/community info

2. Health Assessment

- General health check-ups of family members
- Identification of any existing diseases (hypertension, diabetes, TB, etc.)
- Nutritional assessment (BMI, dietary habits)
- Immunization status, especially in children and pregnant women

3. Environmental Survey

- Housing condition (pucca/kutcha/semi-pucca)
- Sanitation and hygiene (toilets, drainage)
- Drinking water source and storage
- Waste disposal practices

OUTCOME

1. Holistic Understanding of Health

- Students learn that health is not just about diseases but also influenced by social, economic, environmental, and cultural factors.
- They begin to appreciate the role of preventive and promote health care.

2. Clinical and Communication Skills Development

BAREILLY INTERNATIONAL UNIVERSITY

DATE: 11/02/2025

Name of Event: Field Visits On Family Adoption Program

Date: 10/02/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Health Education

- Educating family about personal hygiene, nutrition, family planning, and disease prevention
- Counselling on lifestyle modification (especially for NCDs like diabetes, hypertension)

2. Data Collection and Documentation

- Filling up detailed family folders or case records
- Use of structured proformas provided by the department
- Preparing a family health report

OUTCOME

1.Professionalism and Empathy

- Development of a professional attitude—respect, empathy, confidentiality, and ethical behavior.
- Exposure to real-life health challenges builds social sensitivity and responsibility.

2. Data Collection and Analytical Skills

- Training in systematic data collection, documentation, and analysis.
- Ability to identify health problems, suggest solutions, and sometimes even refer for further care.

DATE: 18/02/2025

Name of Event: Field Visits On Family Adoption Program

Date: 17/02/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Follow-up Visits

- Monitoring improvements or changes in health conditions
- Checking compliance with medical advice or referrals
- Building rapport with the family over time

2. Presentation and Discussion

- Presenting the family study in tutorials or group discussions
- Highlighting key findings, interventions, and learning outcomes

OUTCOME

1.Community Engagement and Health Education

- Students learn how to conduct health education sessions and counsel families on topics like hygiene, nutrition, family planning, etc.
- First hand experience with health-seeking behavior and barriers in rural/urban communities.

2. Foundation for Public Health Thinking

- Encourages students to think beyond the hospital and understand the importance of public health systems, primary care, and community-based interventions.
- Prepares them for future roles in public health policymaking or community service.

3. Academic Evaluation

- Students usually prepare a family study report, which is evaluated.
- They may also present findings in tutorials or internal assessments, which helps in academic growth.

Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 03/03/2025

Name of Event: Field Visits On Family Adoption Program

Date: 01/03/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Follow-up and Reassessment

- Revisit families assigned during 2nd year (if possible).
- Assess changes in health status or environment since the last visit.
- Monitor progress in chronic disease cases (e.g., diabetes, hypertension, TB).

2. Detailed Case Studies

- Select individual cases for in-depth study (e.g., malnourished child, antenatal mother, elderly with chronic disease).
- Apply principles of natural history of disease, levels of prevention, and epidemiological triad.

3. Disease Surveillance & Screening

- Conduct basic screening for common NCDs (e.g., BP, blood sugar).
- Help in identifying suspect cases of infectious diseases.
- Contribute to community-level disease surveillance activities.

OUTCOME

1. Deeper Application of Community Medicine Concepts

- Students integrate theory with practice more effectively—using epidemiology, biostatistics, and health program knowledge in actual family settings.
- Learn to identify determinants of health beyond just the biological model—social, economic, behavioral, and environmental factors.

2. Strengthened Data Interpretation and Analytical Skills

- Better understanding of how to collect, analyze, and interpret health data at the family or community level.
- Ability to draw conclusions and suggest appropriate public health interventions.

3. Clinical-Community Correlation

- Students recognize how clinical conditions manifest in community settings, including issues of health access, follow-up, and compliance.
- Develop a comprehensive approach to disease management—not just diagnosis and treatment, but prevention and rehabilitation too.

Email: info@biu.edu.in Website: www.biu.edu.in

Name of Event: Field Visits On Family Adoption Program

Date: 08/03/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Planning and Implementing Health Education

- Organize group health education sessions on issues like:
  - Nutrition and hygiene
  - Family planning
  - Adolescent health
  - Prevention of communicable and non-communicable diseases
- Use charts, posters, models, or interactive methods

2. Health Program Awareness

- Educate families about National Health Programs like:
  - Janani Suraksha Yojana (JSY)
  - National Immunization Program
  - TB (NTEP)
  - Ayushman Bharat (PM-JAY)
- Help link families with relevant schemes and services

3. Referral and Linkage to Health Services

- Refer high-risk individuals to primary health centers or tertiary care.
- Follow up to ensure health system linkage (for medications, ANC visits, immunizations, etc.)

OUTCOME

1. Individual and Group Health Interventions

- Learn to plan and implement health education sessions tailored to a family's or group's needs.
- Engage in behavior change communication—promoting healthy practices through real engagement.

2. Enhanced Knowledge of National Health Programs

- First hand experience with how government health schemes are actually delivered and received in the community.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) INDIA
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

- Learn to identify gaps in service delivery, and in some cases, help bridge them.

3. Improved Communication and Counseling Skills

- More confident and competent in explaining health information to families of varying literacy levels.
- Practice empathetic listening, motivational interviewing, and cultural sensitivity in diverse communities.

DATE: 15/03/2025

Name of Event: Field Visits On Family Adoption Program

Date: 14/03/2025

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Analysis and Report Writing

- Conduct a comprehensive family case analysis: health problems, needs, solutions.
- Analyze data collected and suggest public health interventions.
- Present findings in departmental discussions or seminars.

2. Use of Technology

- Introduction to mobile health apps, electronic health records, and telemedicine (where applicable).
- Use of simple tools for data entry and disease tracking

3. Academic Evaluation

- Submission of a family folder or case report with updated information.
- Evaluation based on depth of analysis, intervention efforts, and presentation.

OUTCOME

1. Contribution to Continuity of Care

- Provide follow-up care for families adopted earlier, enabling continuity of care and long-term health monitoring.
- Understand the importance of tracking progress and longitudinal health monitoring.

2. Realization of Public Health Responsibilities

- Students start seeing themselves not just as future clinicians, but also as health advocates and community leaders.
- Encourages a sense of social responsibility, especially in underserved areas.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)

DATE: 07/05/2024

Name of Event: Field Visits On Family Adoption Program

Date: 06/05/2024

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

Activities Undertaken

1. Introduction & Rapport Building

- Introduction to the family and explanation of the purpose of the visit.
- Establishing rapport and gaining trust for effective communication.
- Building basic interpersonal and communication skills.

2. Socio-Demographic Data Collection

- Recording family members' details (name, age, sex, education, occupation).
- Understanding family structure: nuclear/joint/three-generation.
- Assessing economic status using tools like Modified B.G. Prasad scale.

3. Environmental Survey

Observation of:

- Type of house (kutcha/pucca/semi-pucca).
- Water supply and storage.
- Waste disposal methods (solid and liquid).
- Ventilation and lighting.
- Presence of vectors (mosquitoes/flies).

Outcomes

1. Understanding of Social Determinants of Health

- Recognize how factors like income, education, occupation, environment, and culture impact health.
- Appreciate the relationship between living conditions and disease patterns.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND

Email: info@biu.edu.in Website: www.biu.edu.in

2. Application of Epidemiological Skills

- Develop skills in history taking, data collection, and analysis.
- Understand the distribution and determinants of health in a family/community context.

3. Enhancement of Communication Skills

- Learn to communicate effectively with individuals and families across socio-cultural backgrounds.
- Build trust and rapport for meaningful health education and interactions.

4. Exposure to Health Systems and Services

- Observe how public health services (ASHA, ANM, PHC, CHC) function at the grassroots level.
- Understand referral pathways and health program implementation at the community level.

1.Environmental Survey

- Observation of:
  - Type of house (kutcha/pucca/semi-pucca).
  - Water supply and storage.
  - Waste disposal methods (solid and liquid).
  - Ventilation and lighting.
  - Presence of vectors (mosquitoes/flies).

2.Health Status & Medical History

- Inquiring about any known illnesses in family members (especially chronic diseases).
- Immunization status of children.
- History of recent hospital visits or treatments.
- Awareness about local health facilities.

3. Nutritional Assessment

- Observing food storage and cooking practices.
- Basic dietary pattern of the family.
- Identifying signs of undernutrition or malnutrition (in children especially).

OUTCOMES

1. Development of Clinical and Observational Skills

- Practice basic clinical examinations: vital signs, nutritional assessment, etc.
- Identify common illnesses and risk factors in the community.

Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) INDIA
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 11/06/2024

Name of Event: Field Visits On Family Adoption Program

Date: 10/06/2024

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Health Education

- Educating family about personal hygiene, nutrition, family planning, and disease prevention
- Counselling on lifestyle modification (especially for NCDs like diabetes, hypertension)

2. Data Collection and Documentation

- Filling up detailed family folders or case records
- Use of structured proformas provided by the department
- Preparing a family health report

OUTCOME

1.Professionalism and Empathy

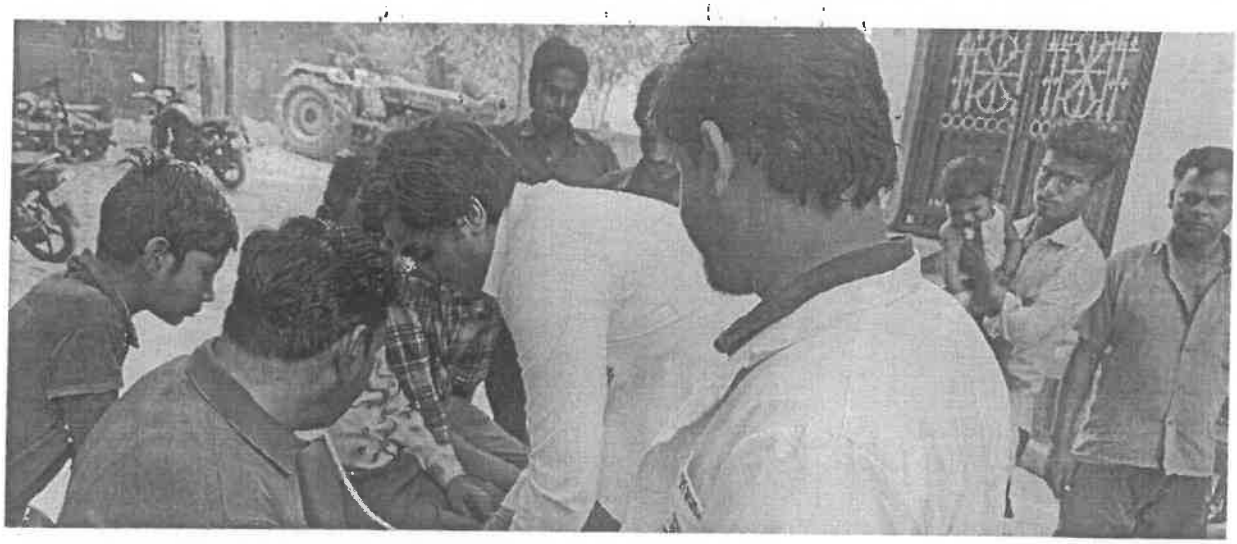

- Development of a professional attitude—respect, empathy, confidentiality, and ethical behavior.
- Exposure to real-life health challenges builds social sensitivity and responsibility.

2. Data Collection and Analytical Skills

- Training in systematic data collection, documentation, and analysis.
- Ability to identify health problems, suggest solutions, and sometimes even refer for further care.

DATE: 18/06/2024

Name of Event: Field Visits On Family Adoption Program

Date: 17/06/2024

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Follow-up Visits

- Monitoring improvements or changes in health conditions
- Checking compliance with medical advice or referrals
- Building rapport with the family over time

2. Presentation and Discussion

- Presenting the family study in tutorials or group discussions
- Highlighting key findings, interventions, and learning outcomes

OUTCOME

1.Community Engagement and Health Education

- Students learn how to conduct health education sessions and counsel families on topics like hygiene, nutrition, family planning, etc.
- First hand experience with health-seeking behavior and barriers in rural/urban communities.

2. Foundation for Public Health Thinking

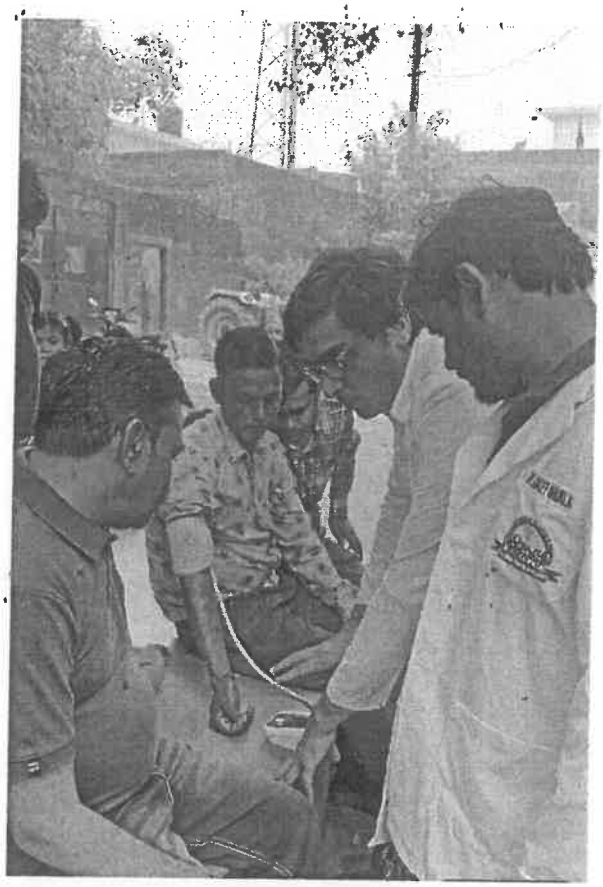

- Encourages students to think beyond the hospital and understand the importance of public health systems, primary care, and community-based interventions.
- Prepares them for future roles in public health policymaking or community service.

DATE: 2/07/2024

Name of Event: Field Visits On Family Adoption Program

Date: 1/07/2024

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Follow-up and Reassessment

- Revisit families assigned during 2nd year (if possible).
- Assess changes in health status or environment since the last visit.
- Monitor progress in chronic disease cases (e.g., diabetes, hypertension, TB).

2. Detailed Case Studies

- Select individual cases for in-depth study (e.g., malnourished child, antenatal mother, elderly with chronic disease).
- Apply principles of natural history of disease, levels of prevention, and epidemiological triad.

3. Disease Surveillance & Screening

- Conduct basic screening for common NCDs (e.g., BP, blood sugar).
- Help in identifying suspect cases of infectious diseases.
- Contribute to community-level disease surveillance activities.

OUTCOME

1. Deeper Application of Community Medicine Concepts

- Students integrate theory with practice more effectively—using epidemiology, biostatistics, and health program knowledge in actual family settings.
- Learn to identify determinants of health beyond just the biological model—social, economic, behavioral, and environmental factors.

2. Strengthened Data Interpretation and Analytical Skills

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

2. Strengthened Data Interpretation and Analytical Skills

- Better understanding of how to collect, analyze, and interpret health data at the family or community level.
- Ability to draw conclusions and suggest appropriate public health interventions.

3. Clinical-Community Correlation

- Students recognize how clinical conditions manifest in community settings, including issues of health access, follow-up, and compliance.
- Develop a comprehensive approach to disease management—not just diagnosis and treatment, but prevention and rehabilitation too.

Dr. Arun Singh

Professor & Head
Deptt. of Community Medicine
Rohilkhand Medical College
BAREILLY

Prof and Head

DATE: 9/07/2024

Name of Event: Field Visits On Family Adoption Program

Date: 8/07/2024

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Planning and Implementing Health Education

- Organize group health education sessions on issues like:
  - Nutrition and hygiene
  - Family planning
  - Adolescent health
  - Prevention of communicable and non-communicable diseases
- Use charts, posters, models, or interactive methods

2. Health Program Awareness

- Educate families about National Health Programs like:
  - Janani Suraksha Yojana (JSY)
  - National Immunization Program
  - TB (NTEP)
  - Ayushman Bharat (PM-JAY)
- Help link families with relevant schemes and services

3. Referral and Linkage to Health Services

- Refer high-risk individuals to primary health centers or tertiary care.
- Follow up to ensure health system linkage (for medications, ANC visits, immunizations, etc.)

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

OUTCOME

1. Individual and Group Health Interventions

- Learn to plan and implement health education sessions tailored to a family's or group's needs.
- Engage in behavior change communication—promoting healthy practices through real engagement.

2. Enhanced Knowledge of National Health Programs

- First hand experience with how government health schemes are actually delivered and received in the community.
- Learn to identify gaps in service delivery, and in some cases, help bridge them.

3. Improved Communication and Counseling Skills

- More confident and competent in explaining health information to families of varying literacy levels.
- Practice empathetic listening, motivational interviewing, and cultural sensitivity in diverse communities.

Dr. Arun Singh

Professor & Prof and Head
Deptt of Community Medicine
Rohilkhand Medical College
BAREILLY.

Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 16/07/2024

Name of Event: Field Visits On Family Adoption Program

Date: 15/07/2024

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Analysis and Report Writing

- Conduct a comprehensive family case analysis: health problems, needs, solutions.
- Analyze data collected and suggest public health interventions.
- Present findings in departmental discussions or seminars.

2. Use of Technology

- Introduction to mobile health apps, electronic health records, and telemedicine (where applicable).
- Use of simple tools for data entry and disease tracking

3. Academic Evaluation

- Submission of a family folder or case report with updated information.
- Evaluation based on depth of analysis, intervention efforts, and presentation.

OUTCOME

1. Contribution to Continuity of Care

- Provide follow-up care for families adopted earlier, enabling continuity of care and long-term health monitoring.
- Understand the importance of tracking progress and longitudinal health monitoring.

2. Realization of Public Health Responsibilities

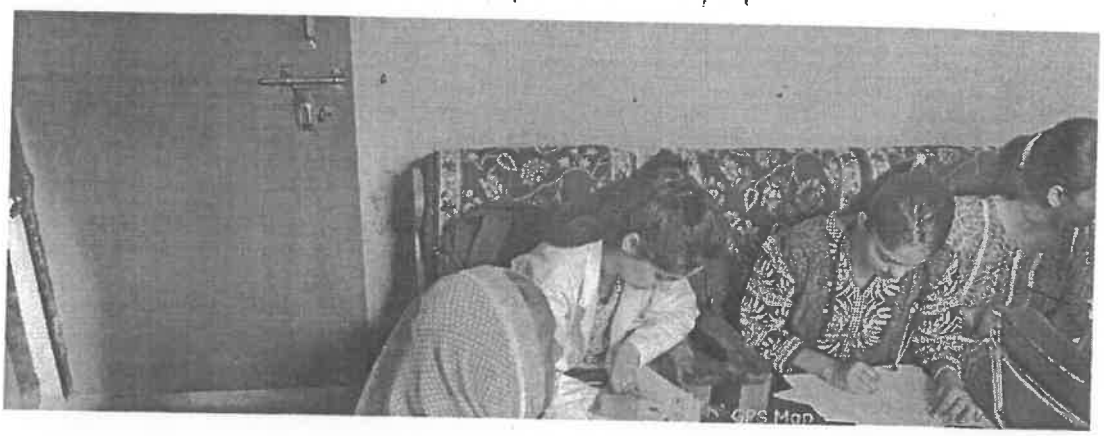

- Students start seeing themselves not just as future clinicians, but also as health advocates and community leaders.
- Encourages a sense of social responsibility, especially in underserved areas.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)

DATE: 08/08/2023

Name of Event: Field Visits On Family Adoption Program

Date: 07/08/2023

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Introduction & Rapport Building

- Introduction to the family and explanation of the purpose of the visit.
- Establishing rapport and gaining trust for effective communication.
- Building basic interpersonal and communication skills.

2. Socio-Demographic Data Collection

- Recording family members' details (name, age, sex, education, occupation).
- Understanding family structure: nuclear/joint/three-generation.
- Assessing economic status using tools like Modified B.G. Prasad scale.

3. Environmental Survey

Observation of:

- Type of house (kutcha/pucca/semi-pucca).
- Water supply and storage.
- Waste disposal methods (solid and liquid).
- Ventilation and lighting.
- Presence of vectors (mosquitoes/flies).

OUTCOMES

1. Understanding of Social Determinants of Health

- Recognize how factors like income, education, occupation, environment, and culture impact health.
- Appreciate the relationship between living conditions and disease patterns.

BAREILLY INTERNATIONAL UNIVERSIT
(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) INI

Email: info@biu.edu.in. Website: www.biu.edu.in

2. Application of Epidemiological Skills

- Develop skills in history taking, data collection, and analysis.
- Understand the distribution and determinants of health in a family/community context.

3. Enhancement of Communication Skills

- Learn to communicate effectively with individuals and families across socio-cultural backgrounds.
- Build trust and rapport for meaningful health education and interactions.

4. Exposure to Health Systems and Services

- Observe how public health services (ASHA, ANM, PHC, CHC) function at the grassroots level.
- Understand referral pathways and health program implementation at the community level.

Dr. Arun Singh

Prof and Head

DATE: 15/08/2023

Name of Event: Field Visits On Family Adoption Program

Date: 14/08/2023

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Environmental Survey

- Observation of:
  - Type of house (kutcha/pucca/semi-pucca).
  - Water supply and storage.
  - Waste disposal methods (solid and liquid).
  - Ventilation and lighting.
  - Presence of vectors (mosquitoes/flies).

2.Health Status & Medical History

- Inquiring about any known illnesses in family members (especially chronic diseases).
- Immunization status of children.
- History of recent hospital visits or treatments.
- Awareness about local health facilities.

3. Nutritional Assessment

- Observing food storage and cooking practices.
- Basic dietary pattern of the family.
- Identifying signs of undernutrition or malnutrition (in children especially).

OUTCOMES

1. Development of Clinical and Observational Skills

- Practice basic clinical examinations: vital signs, nutritional assessment, etc.
- Identify common illnesses and risk factors in the community.

2. Health Education and Behavior Change

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

OUTCOMES

1. Development of Clinical and Observational Skills

- Practice basic clinical examinations: vital signs, nutritional assessment, etc.
- Identify common illnesses and risk factors in the community.

2. Health Education and Behavior Change

- Learn to deliver appropriate health messages.
- Promote healthy practices like hygiene, immunization, and family planning.

3. Fostering Empathy and Ethical Practice

- Build empathy and compassion through firsthand exposure to community living.
- Understand ethical concerns like privacy, consent, and confidentiality.

4. Preparation for Preventive and Promotive Healthcare

- Develop a preventive approach toward healthcare rather than a curative one.
- Realize the importance of early detection and health promotion.

DATE: 22/08/2023

Name of Event: Field Visits On Family Adoption Program

Date: 21/08/2023

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Health Education

- Educating the family (based on observations) about:
  - Hand hygiene and personal cleanliness.
  - Importance of safe drinking water and sanitation.
  - Nutrition for children and pregnant women.
  - Immunization and family planning (if appropriate).

2.Maintenance of Records

- Filling out Family Folder/Proforma.
- Documenting findings in a structured manner (often guided by the department).
- Reflective learning entries (some colleges require journal notes).

3.Faculty Debrief & Discussion

- Presentation of findings during small group discussions.
- Learning from peers' experiences.
- Getting feedback from faculty for improvement.

OUTCOMES

1.Preparation for Preventive and Promotive Healthcare

- Develop a preventive approach toward healthcare rather than a curative one.
- Realize the importance of early detection and health promotion.

BAREILLY INTERNATIONAL UNIVERSITY

Email: info@biu.edu.in Website: www.biu.edu.in

2. Teamwork and Collaboration

- Learn to work in groups with fellow students and community health workers.
- Practice planning, organizing, and reporting as a team.

3. Reflective and Self-Directed Learning

- Encourage critical thinking through reflective journaling and discussions.
- Identify one's strengths and areas for improvement in community engagement.

4.Health Education and Behavior Change

- Learn to deliver appropriate health messages.
- Promote healthy practices like hygiene, immunization, and family planning.

5. Fostering Empathy and Ethical Practice

- Build empathy and compassion through firsthand exposure to community living.
- Understand ethical concerns like privacy, consent, and confidentiality.

DATE: 04/09/2023

Name of Event: Field Visits On Family Adoption Program

Date: 02/09/2023

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Family Profiling

- **Household identification** (name, address)
- Socio-demographic details of all family members
- Educational, occupational, and economic status
- Caste/religion/community info

2. Health Assessment

- General health check-ups of family members
- Identification of any existing diseases (hypertension, diabetes, TB, etc.)
- Nutritional assessment (BMI, dietary habits)
- Immunization status, especially in children and pregnant women

3. Environmental Survey

- Housing condition (pucca/kutcha/semi-pucca)
- Sanitation and hygiene (toilets, drainage)
- Drinking water source and storage
- Waste disposal practices

OUTCOME

1. Holistic Understanding of Health

- Students learn that health is not just about diseases but also influenced by social, economic, environmental, and cultural factors.
- They begin to appreciate the role of preventive and promote health care.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND

Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 12/10/2023

Name of Event: Field Visits On Family Adoption Program

Date: 11/10/2023

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Planning and Implementing Health Education

- Organize group health education sessions on issues like:
  - Nutrition and hygiene
  - Family planning
  - Adolescent health
  - Prevention of communicable and non-communicable diseases
- Use charts, posters, models, or interactive methods

2. Health Program Awareness

- Educate families about National Health Programs like:
  - Janani Suraksha Yojana (JSY)
  - National Immunization Program
  - TB (NTEP)
  - Ayushman Bharat (PM-JAY)
- Help link families with relevant schemes and services

3. Referral and Linkage to Health Services

- Refer high-risk individuals to primary health centers or tertiary care.
- Follow up to ensure health system linkage (for medications, ANC visits, immunizations, etc.)

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

OUTCOME

1. Individual and Group Health Interventions

- Learn to plan and implement health education sessions tailored to a family's or group's needs.
- Engage in behavior change communication—promoting healthy practices through real engagement.

2. Enhanced Knowledge of National Health Programs

- First hand experience with how government health schemes are actually delivered and received in the community.
- Learn to identify gaps in service delivery, and in some cases, help bridge them.

3. Improved Communication and Counseling Skills

- More confident and competent in explaining health information to families of varying literacy levels.
- Practice empathetic listening, motivational interviewing, and cultural sensitivity in diverse communities.

Dr. Arun Singh

Prof and Head

Department of Community Medicine

Professor & Head
Deptt of Community Medicine
Rohilkhand Medical College
BAREILLY.

Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 19/10/2023

Name of Event: Field Visits On Family Adoption Program

Date: 18/10/2023

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Analysis and Report Writing

- Conduct a comprehensive family case analysis: health problems, needs, solutions.
- Analyze data collected and suggest public health interventions.
- Present findings in departmental discussions or seminars.

2. Use of Technology

- Introduction to mobile health apps, electronic health records, and telemedicine (where applicable).
- Use of simple tools for data entry and disease tracking

3. Academic Evaluation

- Submission of a family folder or case report with updated information.
- Evaluation based on depth of analysis, intervention efforts, and presentation.

OUTCOME

1. Contribution to Continuity of Care

- Provide follow-up care for families adopted earlier, enabling continuity of care and long-term health monitoring.
- Understand the importance of tracking progress and longitudinal health monitoring.

2. Realization of Public Health Responsibilities

- Students start seeing themselves not just as future clinicians, but also as health advocates and community leaders.

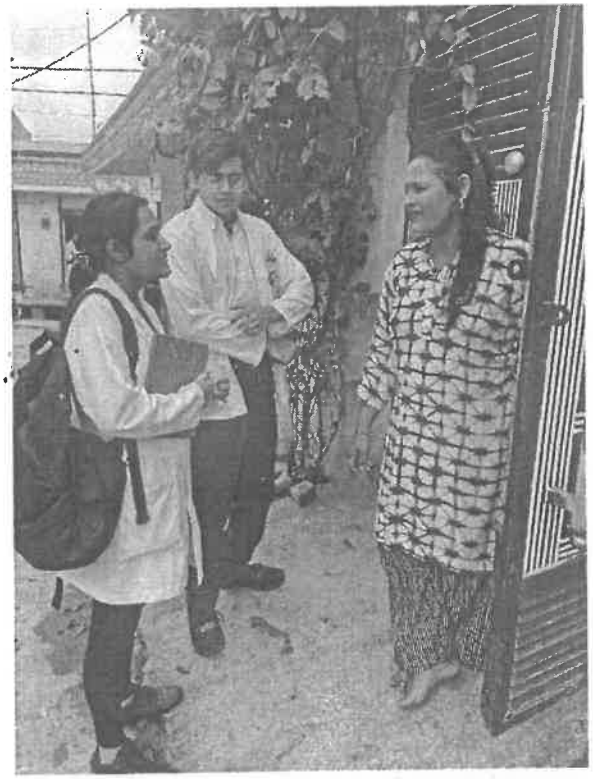

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND

DATE: 07/05/2022

Name of Event: Field Visits On Family Adoption Program

Date: 06/05/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Introduction & Rapport Building

- Introduction to the family and explanation of the purpose of the visit.
- Establishing rapport and gaining trust for effective communication.
- Building basic interpersonal and communication skills.

2. Socio-Demographic Data Collection

- Recording family members' details (name, age, sex, education, occupation).
- Understanding family structure: nuclear/joint/three-generation.
- Assessing economic status using tools like Modified B.G. Prasad scale.

3. Environmental Survey

Observation of:

- Type of house (kutcha/pucca/semi-pucca).
- Water supply and storage.
- Waste disposal methods (solid and liquid).
- Ventilation and lighting.
- Presence of vectors (mosquitoes/flies).

OUTCOMES

1. Understanding of Social Determinants of Health

- Recognize how factors like income, education, occupation, environment, and culture impact health.
- Appreciate the relationship between living conditions and disease patterns.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

2. Application of Epidemiological Skills

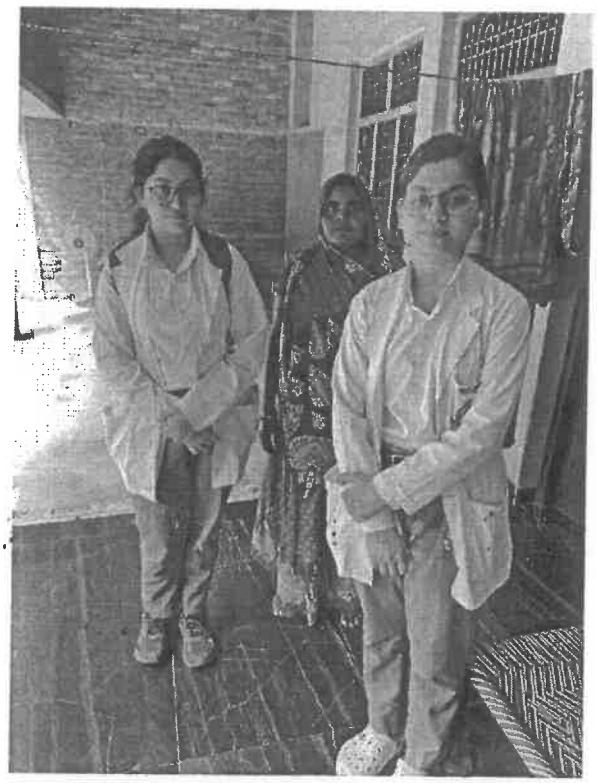

- Develop skills in history taking, data collection, and analysis.
- Understand the distribution and determinants of health in a family/community context.

3. Enhancement of Communication Skills

- Learn to communicate effectively with individuals and families across socio-cultural backgrounds.
- Build trust and rapport for meaningful health education and interactions.

4. Exposure to Health Systems and Services

- Observe how public health services (ASHA, ANM, PHC, CHC) function at the grassroots level.
- Understand referral pathways and health program implementation at the community level.

Dr. Arun Singh
Prof and Head
Department of Community Medicine
BAREILLY.

DATE: 12/05/2022

Name of Event: Field Visits On Family Adoption Program

Date: 11/05/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Environmental Survey

- Observation of:
  - Type of house (kutcha/pucca/semi-pucca).
  - Water supply and storage.
  - Waste disposal methods (solid and liquid).
  - Ventilation and lighting.
  - Presence of vectors (mosquitoes/flies).

2.Health Status & Medical History

- Inquiring about any known illnesses in family members (especially chronic diseases).
- Immunization status of children.
- History of recent hospital visits or treatments.
- Awareness about local health facilities.

3. Nutritional Assessment

- Observing food storage and cooking practices.
- Basic dietary pattern of the family.
- Identifying signs of undernutrition or malnutrition (in children especially).

OUTCOMES

1. Development of Clinical and Observational Skills

- Practice basic clinical examinations: vital signs, nutritional assessment, etc.
- Identify common illnesses and risk factors in the community.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND

Email: info@biu.edu.in Website: www.biu.edu.in

2. Teamwork and Collaboration

- Learn to work in groups with fellow students and community health workers.
- Practice planning, organizing, and reporting as a team.

3. Reflective and Self-Directed Learning

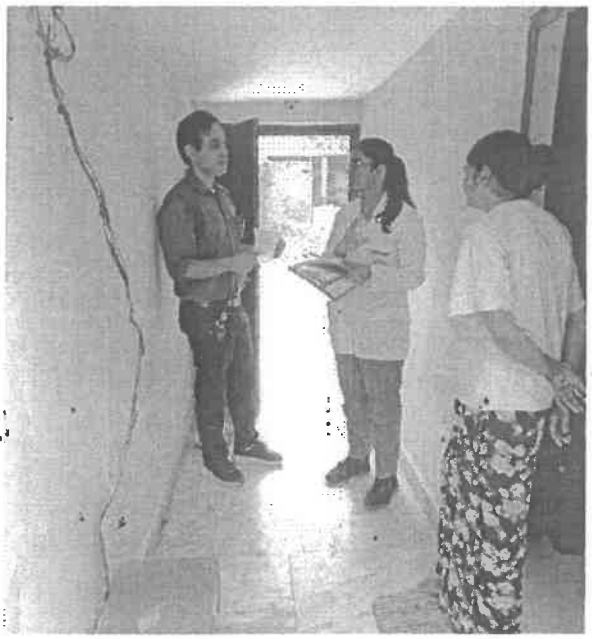

- Encourage critical thinking through reflective journaling and discussions.
- Identify one's strengths and areas for improvement in community engagement.

4.Health Education and Behavior Change

- Learn to deliver appropriate health messages.
- Promote healthy practices like hygiene, immunization, and family planning.

5. Fostering Empathy and Ethical Practice

- Build empathy and compassion through firsthand exposure to community living.
- Understand ethical concerns like privacy, consent, and confidentiality.

DATE: 16/05/2022

Name of Event: Field Visits On Family Adoption Program

Date: 14/05/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Health Education

- Educating the family (based on observations) about:
  - Hand hygiene and personal cleanliness.
  - Importance of safe drinking water and sanitation.
  - Nutrition for children and pregnant women.
  - Immunization and family planning (if appropriate).

2.Maintenance of Records

- Filling out Family Folder/Proforma.
- Documenting findings in a structured manner (often guided by the department).
- Reflective learning entries (some colleges require journal notes).

3.Faculty Debrief & Discussion

- Presentation of findings during small group discussions.
- Learning from peers' experiences.
- Getting feedback from faculty for improvement.

OUTCOMES

1.Preparation for Preventive and Promotive Healthcare

- Develop a preventive approach toward healthcare rather than a curative one.
- Realize the importance of early detection and health promotion.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND

Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 03/06/2022

Name of Event: Field Visits On Family Adoption Program

Date: 01/06/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Family Profiling

- **Household identification** (name, address)
- Socio-demographic details of all family members
- Educational, occupational, and economic status
- Caste/religion/community info

2. Health Assessment

- General health check-ups of family members
- Identification of any existing diseases (hypertension, diabetes, TB, etc.)
- Nutritional assessment (BMI, dietary habits)
- Immunization status, especially in children and pregnant women

3. Environmental Survey

- Housing condition (pucca/kutcha/semi-pucca)
- Sanitation and hygiene (toilets, drainage)
- Drinking water source and storage
- Waste disposal practices

OUTCOME

1. Holistic Understanding of Health

- Students learn that health is not just about diseases but also influenced by social, economic, environmental, and cultural factors.
- They begin to appreciate the role of preventive and promote health care.

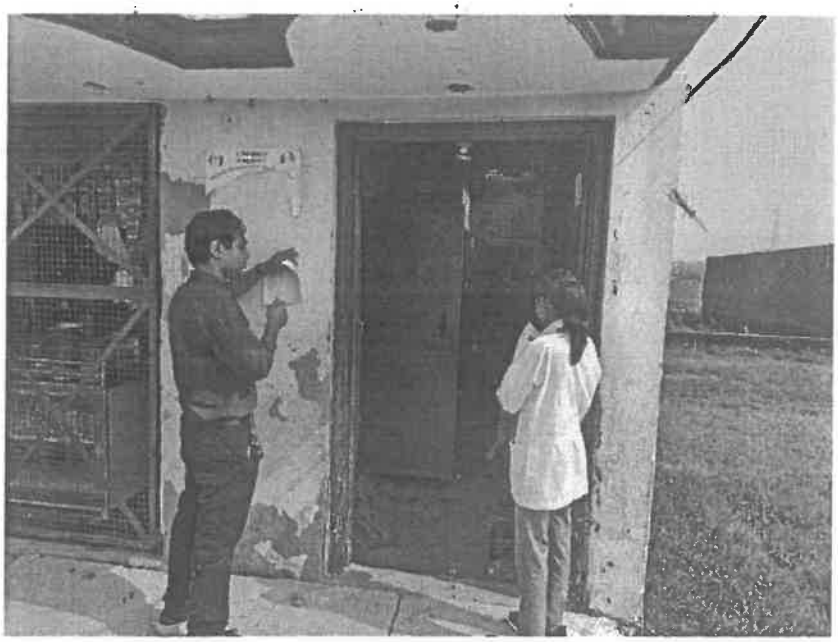

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

- Improved history-taking and clinical examination skills in community settings.
- Enhanced communication skills—talking to people from diverse backgrounds, including vulnerable or illiterate populations.

3. Integration of Theory and Practice

- Students apply concepts like epidemiology, nutrition, sanitation, demography, immunization, etc., in real scenarios.
- Understand how national health programs function at the grassroots level.

DATE: 11/06/2022

Name of Event: Field Visits On Family Adoption Program

Date: 10/06/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Health Education

- Educating family about personal hygiene, nutrition, family planning, and disease prevention
- Counselling on lifestyle modification (especially for NCDs like diabetes, hypertension)

2. Data Collection and Documentation

- Filling up detailed family folders or case records
- Use of structured proformas provided by the department
- Preparing a family health report

OUTCOME

1.Professionalism and Empathy

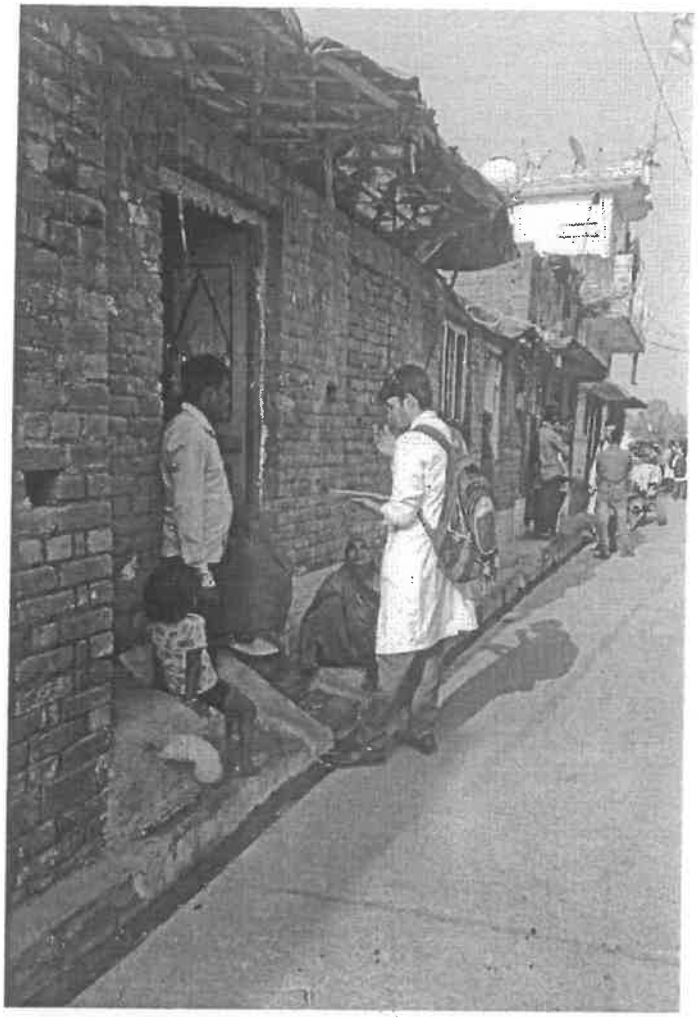

- Development of a professional attitude—respect, empathy, confidentiality, and ethical behavior.
- Exposure to real-life health challenges builds social sensitivity and responsibility.

2. Data Collection and Analytical Skills

- Training in systematic data collection, documentation, and analysis.
- Ability to identify health problems, suggest solutions, and sometimes even refer for further care.

DATE: 18/06/2022

Name of Event: Field Visits On Family Adoption Program

Date: 17/06/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1.Follow-up Visits

- Monitoring improvements or changes in health conditions
- Checking compliance with medical advice or referrals
- Building rapport with the family over time

2. Presentation and Discussion

- Presenting the family study in tutorials or group discussions
- Highlighting key findings, interventions, and learning outcomes

OUTCOME

1.Community Engagement and Health Education

- Students learn how to conduct health education sessions and counsel families on topics like hygiene, nutrition, family planning, etc.
- First hand experience with health-seeking behavior and barriers in rural/urban communities.

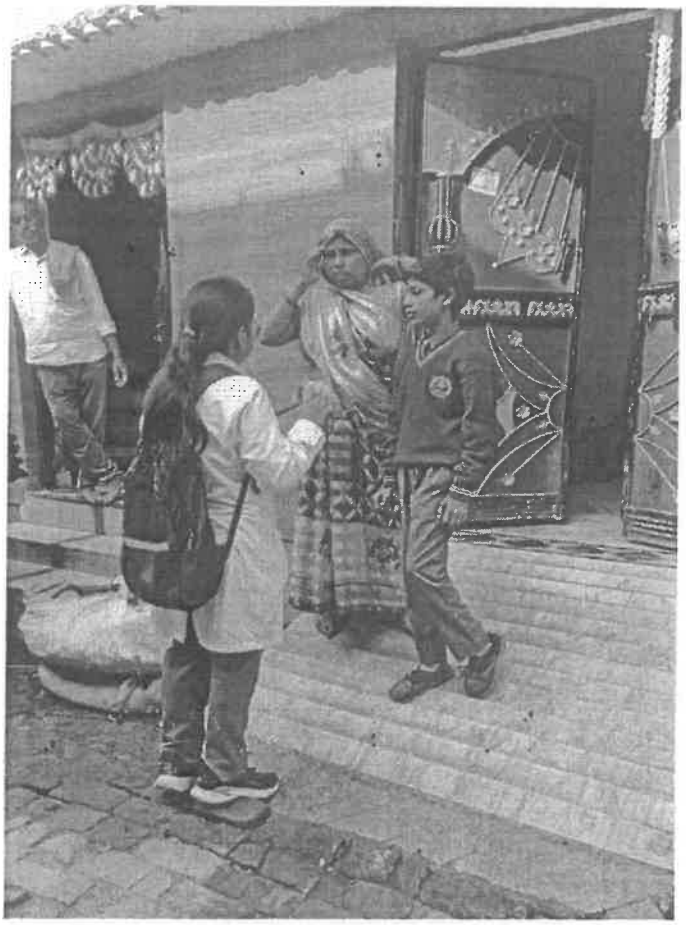

2. Foundation for Public Health Thinking

- Encourages students to think beyond the hospital and understand the importance of public health systems, primary care, and community-based interventions.
- Prepares them for future roles in public health policymaking or community service.

- Encourages students to think beyond the hospital and understand the importance of public health systems, primary care, and community-based interventions.
- Prepares them for future roles in public health policymaking or community service.

3. Academic Evaluation.

- Students usually prepare a family study report, which is evaluated.
- They may also present findings in tutorials or internal assessments, which helps in academic growth.

DATE: 2/07/2022

Name of Event: Field Visits On Family Adoption Program

Date: 1/07/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Follow-up and Reassessment

- Revisit families assigned during 2nd year (if possible).
- Assess changes in health status or environment since the last visit.
- Monitor progress in chronic disease cases (e.g., diabetes, hypertension, TB).

2. Detailed Case Studies

- Select individual cases for in-depth study (e.g., malnourished child, antenatal mother, elderly with chronic disease).
- Apply principles of natural history of disease, levels of prevention, and epidemiological triad.

3. Disease Surveillance & Screening

- Conduct basic screening for common NCDs (e.g., BP, blood sugar).
- Help in identifying suspect cases of infectious diseases.
- Contribute to community-level disease surveillance activities.

OUTCOME

1. Deeper Application of Community Medicine Concepts

- Students integrate theory with practice more effectively—using epidemiology, biostatistics, and health program knowledge in actual family settings.
- Learn to identify determinants of health beyond just the biological model—social, economic, behavioral, and environmental factors.

2. Strengthened Data Interpretation and Analytical Skills

Email: info@biu.edu.in Website: www.biu.edu.in

DATE: 16/07/2022

Name of Event: Field Visits On Family Adoption Program

Date: 15/07/2022

Place of Event: Dhaurera Mafi, Bareilly

Objectives of the Visit:

- To understand the socio-demographic profile of the family.
- To assess environmental, economic, and health-related conditions.
- To identify health problems and risk factors.
- To provide basic health education and promote preventive practices.
- To develop communication skills and community rapport.

ACTIVITIES UNDERTAKEN

1. Analysis and Report Writing

- Conduct a comprehensive family case analysis: health problems, needs, solutions.
- Analyze data collected and suggest public health interventions.
- Present findings in departmental discussions or seminars.

2. Use of Technology

- Introduction to mobile health apps, electronic health records, and telemedicine (where applicable).
- Use of simple tools for data entry and disease tracking

3. Academic Evaluation

- Submission of a family folder or case report with updated information.
- Evaluation based on depth of analysis, intervention efforts, and presentation.

OUTCOME

1. Contribution to Continuity of Care

- Provide follow-up care for families adopted earlier, enabling continuity of care and long-term health monitoring.
- Understand the importance of tracking progress and longitudinal health monitoring.

2. Realization of Public Health Responsibilities

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) IND
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

- Students start seeing themselves not just as future clinicians, but also as health advocates and community leaders.
- Encourages a sense of social responsibility, especially in underserved areas.

3. Academic and Research Preparedness

- Learn to document findings in a structured, professional way.
- Gain experience that forms the basis for community-based research projects, public health audits, or postings like field visits.

FORMAT FOR SUBMISSION OF PROTOCOL INVOLVING THESIS/RESEARCH IN HUMAN SUBJECTS FOR CLEARANCE BY INSTITUTE ETHICS COMMITTEE OF RMCH, UP FOR MD/MS STUDENTS & RESEARCHERS (FOR THESIS/ORIGINAL RESEARCH)

Submit Three (3) copies of the all documents along with Covering letter to the Secretary, Institute Ethics Committee, RMCH.

The Investigator must submit protocol through Guide and Head of Department who ensures that the project has been wetted both from the scientific and ethical point of view.

No thesis work shall be / can be started unless ethics clearance/approval is obtained. Please bear in mind that no retrospective / Post facto ethical clearance can be provided to research projects which were neither submitted nor wetted by the ethics committee.

The research projects proposal submitted should be as follows:

1. Full Title of Study:	Benefits of early ambulation of patients who underwent abdominal surgery (Laparotomy) : An interventional study
2. Name & Signature of the candidate	Aditi Aditi
3. Department	Surgery
4. Degree/Course	MBBS
5. Month & Year of submission of Protocol	January, 2023
6. Email ID of the Candidate	draditi.bhrhman@gmail.com
7. Name of Faculty & Department (Guide/Co-guide at least one)...	1) Dr. Sujoy Mukherjee (Surgery) 2) 3) 4)
8. Aim & objectives of the study	Aim:- To study the benefits of early ambulation of patients who underwent abdominal surgery (Laparotomy). Objectives:- 1) To assess the mean duration of stay in hospital. 2) To assess the prevention of surgical site infection. 3) To assess the prevention of deep vein thrombosis 4) To assess the prevention of basal lobe atelactiasis resulting in pneumonia. 5) To assess the return of normal peristalsis of bowel.
9. Why this study is required? Please provide brief justification.	One of the most effective recovery procedures that can be done is post operative exercises. Early ambulation is done immediately to the patients of laparotomy, exercises on bed, leg exercises, left & Right sloping etc. until patient start to walk without external support.

10. Methodology (In brief)	Multicentered: Single centered: ✓ Duration of study: 2 months Dose the study involve use of: Drug Devices Vaccines Other —
11. Permission from Drug Controller General of India (DCGI)	Required Not required Received: Applied:
12. Permission from Biohazard Management	Required: Received: Not required Applied:
13. How you will maintain Confidentiality of subject?	Through consent form.
14. Participant Information Sheet	Attached English Version Attached Hindi Version
15. Participant Informed Consent Form	Attached English Version Attached Hindi Version
16. Do you have conflict of interest? (Financial/nonfinancial) if Yes, specify	Nil
17. Attached documents	Please make a list ..... 1. Attached information sheet ✓ 2. Informed Consent Form ✓ 3.

(DECLARATION BY THE PRINCIPAL INVESTIGATOR)

I hereby declare that:

1. Voluntary written consent of the human subject will be obtained.
2. In case of children and mentally handicapped subjects-voluntary written informed consent of the parents/guardians will be be obtained.
3. The probable risk involved in the project will be explained in full details to the subjects/parents guardians.
4. Subjects/parents/guardians will be at liberty to opt out of the project at any time.
5. I will terminate the experiment at any stage, if I have probable cause to believe, in the exercise of the good faith, skill and careful judgment required for me that continuation of the experiment is likely to result in injury, disability of death to the experimental subject.

ROLE OF STEP SERIAL SECTIONING OFNODE OF HEAD AND NECK SQUAMOUS CELL CARCINOMA IN DETECTION OF MICRO METASTASIS.

GUIDE-Dr. MITHILA BISHT

MENTOR-Dr. MAHIMA JAISWAL.

SUBMITTED BY -BIDISHA SEN AND AVINASH GANGWAR

INTRODUCTION

Head and neck squamous cell carcinoma is a broad entity which includes neoplasms arising from different sites of head and neck regions. It consists of cancers of the oral cavity, pharynx, larynx, paranasal sinuses and nasal cavity, and salivary glands. These carcinomas begin in the flat squamous cells which make up the thin layer of tissue on the surface and mucosal lining of head and neck. If cancer is found only in the squamous layer of cells (restricted to epithelium), it is known as carcinoma in situ, and if it invades into deeper layers, it is known as invasive squamous cell carcinoma. Head and neck squamous cell carcinoma is the sixth most common neoplasm in the world. Seeing the current rates, it is estimated that more than 6,50,000 cases worldwide will be diagnosed each year. The annual global mortality rate from head and neck squamous cell carcinoma is over 11,000 which corresponds to 2 per cent of cancer deaths.
[1)]Approximately 95 percent of cancers arising from head and neck are squamous cell carcinomas. Oral cavity cancers including buccal mucosa and tongue carcinomas are more commonly found in the Indian subcontinent. The pathological stage of Head and neck SCC in determined from the TNM staging system (AJCC 8th edition).

Squamous cell carcinoma of head and neck regions frequently metastasize to regional (usually cervical) lymph nodes which are the primary site of arrest of tumour cells. Lymph node metastasis is the

ELECTIVE POSTING

(08/02/25 – 22/02/25)

Name : SURYA SINGH

Roll No : 121

Batch : 2021

Name of Block : Block-2

Name of Elective : Physiology

Topic : A study to assess the association of Body Mass Index with PCOD in semi-urban Bareilly in adoloscent female.

Guided by - Dr. Ankur

ELECTIVE POSTING

(08/02/25 – 22/02/25)

NAME :- NAMAN DHINGRA

ROLL NO :- 149/22110107S

BATCH :- 2021

NAME OF BLOCK :- BLOCK-1

NAME OF ELECTIVE :- DEPARTMENT OF PHYSIOLOGY

TOPIC :- How to select a Research topic and write Introduction of Research topic

GUIDED BY :- DR. ANKUR, Profession
Department of Physiology
RMCH, Bareilly

ROHILKHAND MEDICAL COLLEGE AND HOSPITAL

DEPARTMENT OF PHYSIOLOGY

Date-(7/2/25 - 22/2/25)

Use of Excel in statistics

Submitted by-
Rati Srivastava
Roll no -88
Batch-2021
Mob no-8081080140

Name of preceptor
Dr SK Verma
HOD And Professor

Rohilkhand Medical College and Hospital

To,

The Principal
Rohilkhand Medical College and Hospital
Bareilly

Subject: Name of supervisors and Project topics during Elective postings in Biochemistry

Sir,

As per discussion in the meeting held on 15th February 2022, I am hereby sending the name of supervisors and topics for research projects during elective postings of MBBS students of Phase 3 part I.

Name of supervisors:

1. Dr Shikha Saxena
2. Dr Sumeru Samantha
3. Dr Basant K. Joshi
4. Dr Reena Rani

Project Topics:

1. Study of anthropometric markers in patients of metabolic syndrome
2. Comparative study of renal function tests in hypertensive subjects
3. Study of serum protein and albumin in hypothyroid patients
4. Study of serum electrolytes in renal failure patients

This is for your kind information please.

Thanking You

Yours Sincerely

Dr Shikha Saxena
Professor & Head
Dept. of Biochemistry

Rohilkhand Medical College & Hospital Bareilly
Department of Biochemistry

STUDY OF SERUM ELECTROLYTE IN RENAL FAILURE PATIENT

Study by – Ashna kumari

Preceptor – Dr.Dipti Sanakal

INTRODUCTION

Chronic Renal Failure is a public health problem affecting 5-10% of the total population. It is defines as kidney damage or GFR <60 ml/min/1.73m^2 for 3 months.

Sodium is the chief cation of extracellular fluid and is required for the maintainace of osmotic pressure. Potassium is the major intracellular cation for osmotic pressure. It is of great importance in renal failure because kidney regulates and maintains a narrow range of electrolyte fluctuations.

AIM

Study of electrolytes in Renal failure patients.

OBJECTIVES- 1.Estimation of sodium

2. Estimation of Potassium

MATERIAL AND METHODS

The study includes 30 chronic renal failure patients of both sexes .The cases were grouped as follows:

GROUP I : Normal Healthy Controls = 30 cases.

GROUP II: Chronic Renal failure Cases =30 cases

Collection of sample: Under aseptic precautions, blood sample taken in the plain vial . Serum was separated and was then analysed by the machine.

Machine used = EasyLyte

Result:

Control : It has been observed that in the present study of CRF of different aetiology, the mean value of serum sodium was 132 .5 ± 15.62 and serum potassium was 4.48 ± 1.07.The comparison of serum sodium and serum potassium levels between control cases and CRF cases were found to be statically not significant (p>0.005).

Summary and Conclusion

Serum sodium level and serum potassium level were similar to control group and was within normal range .

The serum sodium and potassium level were not much deranged and were almost found within normal range.

Home assignment project (Models/charts)

S.NO.	Topics	Mentor	Batch
1	Transport mechanisms (with glucose receptors)	Dr Dipti.Sanakal	**Batch C2** Roll No- 120-150
2	Electron Transport Chain (with inhibitors)	Dr Sumeru Samanta	**Batch B2** Roll No- 76-100
3	Structure of Insulin (Receptor and mechanism of action)	Dr Mamta Gupta	**Batch A2** Roll No- 26-50
4	Structure of Lipoproteins (Including Atherosclerosis)	Dr Mohid Raza	**Batch C1** Roll No- 101-125
5	Urea cycle (Including disorders)	Dr Dipti Sanakal	**Batch B1** Roll No- 51-75
6	Integration of metabolism (Fed state and starvation)	Dr Sumeru Samanta	**Batch E2** Roll No- 226-250
7	Metabolism in Diabetes Mellitus (including complications)	Dr Mamta Gupta	**Batch D2** Roll No-176-200
8	Components of Gel Electrophoresis (pattern in different diseases)	Dr Mohid Raza	**Batch A1** Roll No- 1-25
9	Vitamin D (activation, mechanism of action, deficiency manifestations)	Dr Dipti.Sanakal	**Batch E1** Roll No- 201-225
10	Vitamin A (Wald's visual cycle, deficiency manifestations)	Dr Sumeru Samanta	**Batch D1** Roll No- 151-175

Home Assignment / Library Assessment

Total Assessment Marks :30 Marks (15+15)

Home Assignment Project (Models /Charts) will be allotted to the group of students (25 in each group) by random chip system from 12th February 2024 onwards. Mentors will be appointed for each project that will be displayed on the notice board. Projects / Models should be submitted latest by 5th April 2024. Post submission there will be presentation & viva by the group of students on the given project at the date notified later, which with be graded accordingly. Kindly contact respective Mentors / Dr. Dipti B. Sanakal in case of any query.

SVL Lab Activity Assessment

Date	14th June 2024
Time	9:00 p.m.
Via	Google link
Marks	40 Marks
Exam	MCQ Based

Topics :-

1. Commonly used lab apparatus and equipments.
2. Good & safe lab practice.
3. Waste disposal.
4. Preparation of buffers.
5. Estimation of pH.
6. Commonly used techniques in biochemistry lab.
7. Vacutainers.

TESTS FOR PHENYLKETONURIA -

1) Chromatography - To determine blood phenylalanine levels.
Normal level - 1 mg/dl
PKU - >20 mg/dl

2) Tandem mass spectroscopy - It involves direct enzyme measurement - Most reliable, levels of Phenylalanine above 150 μmol/L in neonates. It is a costly method. In older children to detect levels above 120 μmol/L. Dihydrobiopterin reductase measurement.

3) Guthrie Test -
It is a bacterial inhibition assay to monitor the blood phenylalanine level within a period of 3 days.

PROCEDURE -
A spot of blood is taken on a filter paper disk and is placed on the surface of an agar plate which contains a substance to inhibit bacterial growth.
- High phenylalanine levels can overcome this inhibition.
- After overnight incubation, bacterial growth is compared with a control disk by measuring the diameter of growth zone.

Amount of phenylalanine in blood of patient can be estimated

1) DNA probes - Diagnose the defects in phenylalanine hydroxylase and dihydrobiopterin deficiency.

2) Ferric chloride test - To detect presence of phenylpyruvate in urine.
Normal level of phenylketones in urine - 500 - 3,000 mg/day
Detected by adding a drop of ferric chloride to urine.
Transient blue-green color is a positive test.
Less reliable.

3) HPLC - High Performing Liquid Chromatography -
It is used to detect Phenylketonuria at about 1 mg Phenylalanine
Applicable on standard chromatographic equipment - Gas liquid pump and ultraviolet detector. sufficiently sensitive
- early diagnosis is crucial for preventing intellectual disabilities.

→

7) Serum Phenyl Alanine levels / screening:-
Blood test to look for signs of PKU. Detects abnormal levels of Amino acid - Phenylalanine. Routine Screening Test in newborn. Test should be performed in 1st 48-72 hours of life because infant's skin, most often heals is cleaned with a germ killer and punctured with a sharp needle 3 drops of blood are placed in 3 separate test circles → laboratory and mixed with bacteria.

Normal → 2 to 6 mg/dl
→ > 20 mg/dl - Bad prognosis.

Anjali Tyagi
Roll no - 41

Roll no → 153

Methods of Diagnosis of Phenylketonuria

1] Screening test : Guthrie test
2] Confirmatory test : Tandem mass spectrometery chromatography
3] Prenatal diagnosis : DNA probes
4] other test : a) Ferric chloride test
b) serum phenylalanine level
c] HPLC

1] Screening test: Guthrie test
↳ Also called PKU Test ⇒ diagnostic tool to test infants for phenylketonuria a few days after birth.
- Guthrie card is used to collect capillary blood from infant's heel

Q- What is it used for ?
→ It is used to see if a new born has high blood level of phenylalanin in their blood. This may mean body has phenylketonuria.

Q- Why does baby need a PKU screening test?
→ They may also be tested if they have any symptoms of PKU, which include
- Delayed development
- Intellectual development
- Musty odour in breathe, skin and urine
- Microcephaly - usually small head

Q what happens during a PKU screening test?
→ Health care provider will clean baby's heel with alcohol. The heel is will be pricked and few drops of blood. The heel will be bandaged. To get accurate test results, baby needs to have some protein from breast milk before the sample is taken.

Q - what do the result mean?
→ If the result are normal, it means that amount of phenylalanine in baby is normal. If your baby result are not normal, it means high level of phenylalanine were found in your baby blood. Baby most likely has PKU

▲ PKU Screening Test :
- A small drop of blood is taken from heel of newborn & applied to a card.
- In original form of test, a punch out of dried disc was incubated on a petridish plated with bacteria (Bacillus subtilis) in presence of growth

overcome the inhibition & allow bacteria to grow.

Confirmatory test: Tendem mass spectrometery chromatography.

⇒ Tendem mass spectrometery is most universal platform currently available for analysis of enzymatic activities and biomarkers in dried blood spots (DBS) for application in new born screening.

3] Prenatal diagnosis: DNA Probes → Amniocentesis

Prenatal dignosis of classic phenylketonuria was performed in two at risk families by means of a cloned human phenylalanine hydroxylase gene probe which was used to analyse DNA isolated from cultured amniotic fluid cells. The diagnosis of PKU foetus in one family and a heterozygous foetus in another family were confirmed after birth. The prenatal diagnosis procedure by DNA analysis can be confidently applied to 90% of causal families with previously affected children.

4] Other test

a] Ferric chloride test

→ Urine sample is collected on filter paper and dried.

→ To conduct a ferric chloride urine test, a doctor dissolved a urine sample in a solution of water ethanol and a few drops of ferric chloride. If phenyl pyruvate was present in the sample it formed a complex with the ferric chloride and produce an intense blue-green colour, indicating that the patient had phenylketonurea.

b] HPLC [High performance liquid chromatography]

→ The purpose HPLC analysis of any drug is to confirm the identity of a drug & provide quantitative results and also to monitor the progress of the therapy of a disease.

c] Serum phenylalanine Level:

→ Normal levels of phenylalanine in blood are less than 2mg/dL. More than 4mg/dL of phenylalanine in blood is considered high & may mean your child has PKU.
