लखनऊ : दिनांक : 30-01-2021

प्रिय महोदय / महोदया,

आप अवगत है कि कोविड वैक्सीनेशन का कार्य प्रदेश में प्रारम्भ हो गया है। इस कार्य में कोवीशील्ड और को–वैक्सीन दोनों ही प्रकार की वैक्सीन का प्रयोग किया जा रहा है। प्रथम चरण में स्वास्थ्य कर्मियों का और द्वितीय चरण में फ्रन्ट लाइन वर्कर्स का टीकाकरण किया जाना है।

कोविड टीकाकरण के इन दो चरणों का कलेण्डर निम्नवत् होगा:–

1. **हेल्थ केयर वर्कर्स**

प्रथम डोज	द्वितीय डोज
16.01.2021	15.02.2021
22.01.2021	19.02.2021
28.01.2021	25.02.2021
29.01.2021	26.02.2021
04.02.2021	04.03.2021
05.02.2021	05.03.2021
15.02.2021 Mop Up	15.03.2021 Mop Up द्वितीय डोज

2. **फ्रन्ट लाइन वर्कर्स**

05.02.2021	05.03.2021
11.02.2021	16.03.2021 (11.03.21 को शिवरात्रि के कारण)
12.02.2021	12.03.2021
18.02.2021	18.03.2021
22.02.2021 Mop Up	22.03.2021 Mop Up

स्वास्थ्य कर्मियों के सत्रों के निर्धारण के संबंध में पूर्व में निर्देश दिये जा चुके हैं, जिसके अनुसार कार्यवाही की जा रही है।

प्रथम डोज

फ्रन्ट लाइन वर्कर्स के लिए निम्नवत् व्यवस्था की जायेगी :–

दिनांक :	05.02.2021	10 प्रतिशत
	11.02.2021	30 प्रतिशत
	12.02.2021	30 प्रतिशत
	18.02.2021	30 प्रतिशत
	22.02.2021	Mop Up

कक्ष संख्या 401, 409, लाल बहादुर शास्त्री भवन (एनेक्सी), उ०प्र० सचिवालय
दूरभाष : (0522) 2239306, 2215510, फैक्स : 0522 – 2215874, ई-मेल : psecup.health@gmail.com

ध्यातव्य है कि स्वास्थ्य कर्मियों के प्रथम चरण का Mop Up राउण्ड 15.02.2021 को किया जायेगा। इसी दिन दिनांक 16 जनवरी को प्रतिरक्षित किये हुए स्वास्थ्य कर्मियों को द्वितीय डोज भी दी जाएगी।

कृपया उपरोक्तानुसार कार्यवाही करने का कष्ट करें। FLW के संबंध में विस्तृत दिशा–निर्देश पृथक से भी जारी किए जाएँगें।

सदभावनाएँ,

भवनिष्ठ,

30.1.21

विषय – कार्ययोजना एवं कोविड-19 संबंधित सूचना उपलब्ध कराये जाने के सम्बंध में।

महोदय,

आपके पत्रांक संख्या एम.ई./2020/3588 दिनांक 4 नवम्बर, 2020 के संदर्भ में रोहिलखण्ड मेडिकल कालेज एवं हास्पिटल, बरेली की ओर से अपेक्षित सूचनायें निम्नवत् है :-

1. हमारे अस्पताल में 25 आई.सी.यू. बेड्स के साथ कुल 400 बेड्स का कोविड अस्पताल सभी आवश्यक उपकरणों के साथ तैयार है। समस्त डाक्टरों, नर्सों, पैरामेडिकल एवं अन्य स्टाफ कोविड रोगियों की देखभाल के लिए पूर्ण रूप से प्रशिक्षित हैं। हमारे द्वारा आज तक 660 मरीजों को सेवा दी जा चुकी है और लगभग 77 प्रतिशत मरीज ठीक किये जा चुके हैं जो कि गंभीर और अति गंभीर रूप से कोविड-19 महामारी से ग्रसित थे।
2. आगे आने वाले समय में हम अपने आई.सी.यू. बेड्स को 25 से बढ़ाकर 45 करेंगे एवं हम बेहतर सेवाओं के लिए सेंट्रल मॉनीटरिंग सिस्टम अपने आई.सी.यू. में लगवायेंगे जिससे अति गंभीर मरीजों का अधिक बेहतर तरीके से ध्यान रखा जा सके।
3. आगे आने वाले दो तीन वर्षों में हम एक अलग कोविड यूनिट तैयार करेंगे जिससे अगर इस महामारी से कोई ग्रसित होता है तो हम उसका इलाज अधिक बेहतर तरीके से कर सकें एवं बाकी समस्त सेवायें भी सुचारू रूप से दे सकें।
4. यह सूचना हमारे मेडिकल कालेज के स्तर पर उपलब्ध नहीं है।
5. यह सूचना हमारे मेडिकल कालेज के स्तर पर उपलब्ध नहीं है।
6. यह सूचना हमारे मेडिकल कालेज के स्तर पर उपलब्ध नहीं है।
7. कुल भर्ती मरीजों की संख्या - 660, कुल ठीक हुये मरीजों की दर - 77 प्रतिशत, मृत्यु दर - 14 प्रतिशत, कुल टेस्टिंग - 1886, नॉन कोविड मरीजों के अस्पताल के हर विभाग में डाक्टरी सलाह, ओ.पी.डी. एवं आई.पी.डी., समस्त प्रकार की जांच सेवायें, शल्य क्रिया व लेबर रूम की सुविधायें उपलब्ध हैं।
8. हमारे मेडिकल कालेज में कुल 25 आई.सी.यू. बेड्स संचालित हैं जिनमें से 20 वेंटीलेटर युक्त बेड्स हैं।

सधन्यवाद।

RMCH/1340/2021

Dated : 30th September, 2021

To,

The Director General
Medical Education & Training
UP Govt., Lucknow.

Sir,

As per the letter no E -1/2021/5464 the information of the Rohilkhand Medical College and Hospital is as follows.

1. No. of patient admitted in COID 19 1st wave = 660
   No. of patient admitted in COID 19 2nd wave = 471
2. No. of deaths in COID 19 1st wave = 93
   No. of deaths in COID 19 2nd wave = 212
3. Treatment management in 1st and 2nd wave was as per GOI, Ministry of Health & Family Welfare and AIIMS, Delhi protocol.
4. Training of the HCW was conducted as per the guidelines of GOI
   The training was given under following head in 1st wave

Dialysis training		**Ventilator training**		**General training on IPC and management of emergency and trauma**	
Doctors	140	Doctors	111	Doctors(MBBS)	7
Technician	4	Technician	29	Clinical specialist	71
Nurse	26	Nurse	30	Preclinical specialist	40
				Clinical SR	17
				Clinical JR	105
				Pre/ para clinical JR	9
				INTERNS	68
				Technician	40
				Nurses	292
				Pharmacist	10
				Ward boy	336
				Ambulance driver	4

The training was given under following head in 2nd wave:

1. Management of severe cases
2. Management of oxygen therapy
3. Management of ventilation
4. Management of dialysis

5. The following scientific papers were published in year 2020-2021

S. No.	Topic	Author	Journal	Year
1	Independent association between, biochemical and clinical outcome in COVID-19 patients at a tertiary care centre in India	Sikha Saxena, Abhinav Srivastava, Rashmi Katyal, Prem Chandra Srivastava, Reena Rani	Internetional Journal of Medical Science and Current Research	2021;4(1):7 44-756
2	Standard operating procedure on dead body management & medical certification of cause of death for COVID-19: Development & Implimentation	Agnivesh, Srivastava PC, Seth S, Mohan N, Saxena S	International Journal of Medical Science and Current Research	2021; 4(3) : 780-87
3	Assosiation of haematological and biochemical markers with ICU admission of COVID-19 Patients: A cross-sectional study	Saxena S, Rani R, Srivastava PC, Katyal R.	International Journal of Advanced & Integrated Medical Science	Aug-21
4	E-learning and online assessment in COVID-19 era: Students' perspective.	Saxena S, Srivastava P, Katyal R, Rani R, Das B.	International Journal of Medical Science and Current Research	March-April 2021; 2(4) :379-390
5	Post COVID-19 vaccination survey from medical professionals : A questionnaire based study.	RANI R and Saxena S.	International journal of scientific research (IJSR).	April 2021 : 10(04) : 19-21

6	Independent association between, biochemical and clinical outcome in COVID-19 patients at a tertiary care centre in India	Saxena S, Srivastava A, Katyal R, Srivastava PC, Rani R.	International Journal of Medical Science and Current Research (IJMSCR)	January-February 2021; 4(1): 744-756.
7	Anaesthetic sonsideration in management of Sino-Orbital Mucormycosis in Post COVID diabetic patients: A case series.	Disha Parhi, Mohd Khalik Ansari*, Akash Gupta, Malti Agarwal,	IJCMR (International Journal of Contemporary Medical Research)	August 2021, Issue 8, Vol 8.
8	Anaesthetic consideration for Rhinocerebral Mucormycosis case using Ketamine As including and maintenance agent: A case report.	Akash Gupta*, Sadiya Shakeel, Malti Agarwal	IJCR (Internation Journal of Current Research)	

6. Media coverage was done frequently as and when required

8. C ore challenges during 1st wave and 2nd wave of COVID 19 was

    1. The foremost challenge was the training of ventilator and dialysis to the staff
    2. Apprehension level of the staff to handle the pandemic
    3. Setting the system between inside and outside the COVID 19 ward
    4. In the 2nd wave the core problem was availability of the lifesaving medicines and oxygen.

    Learning during 1st wave and 2nd wave of COVID 19 was

    1. How to handle the crisis
    2. How to keep a balance between the physical and mental challenges
    3. Generalized training of the critical life support is mandatory at all level of workforce

9. Non C OVID work was done only in the Emergency department, Antenatal and Neonatal clinics, Radiotherapy / C hemotherapy and Dialysis services rest all was shut down.

10. Photographs of the pandemic as follows :

11. Preparedness for the 3rd wave:
It is been done as per the G OI and G ovt. Of U.P. guidelines.

Thanking you.

Yours Sincerely

(Dr. Chander Mohan)

Sub: Booklet on "Combating Covid 19 Pandemic in UP: Efforts of Medical Education Department"

Sir / Madam

The Medical Education department is preparing a document on the above-mentioned subject.

We request you to provide information during this time of your institute in Combating Covid 19 Pandemic, as a brief write up (in a MS WORD copy). We shall appreciate if the said information is provided to us by 30th Sept. 2021.

Some Points that need to be included in the booklet are

1. Number of patients admitted in Covid waves I & II.
2. Numbers of deaths during Covid waves I & II.
3. Details highlighting the treatment given Covid waves I & II.
4. Details regarding training provided to HCWs
5. Scientific Publications pertaining to COVID-19 research made.
6. Media coverage pertaining to COVID-19 with some special mention if any.
7. Special role of HCWs if any.
8. Core challenges and key learnings during Covid waves I &II .
9. Non-COVID work managed at your institute during Covid waves I &II .
10. 2-3 relevant photographs from the institute.
11. Preparedness for the third wave.

Thank you

Director General

आज़ादी का अमृत महोत्सव

DO No.8-259/2022-23/NCVBDC/ELF
Dated: November 21, 2022

Dear Madam / Sir,

Elimination of Lymphatic Filariasis is a public health priority and is targeted for elimination by 2030. The national program has taken several measures in the recent past for accelerating the progress towards the goal of elimination of Lymphatic Filariasis.

2. Significant progress has been made with Mass Drug Administration (MDA) but surveillance activities, morbidity management and disability prevention to prevent and manage LF- related disability in endemic communities remain a challenge. To address these challenges and to enhance access to quality services in Lymphatic Filariasis, medical colleges may play a vital role in accelerating the elimination goal. The responsibility of surveillance and interventions in terms of diagnosis and treatment under the Lymphatic Filariasis programme needs to be more targeted by engaging the medical colleges and its departments namely Medicine / PSM / dermatology / paediatrics in the targeted districts. The list of medical colleges along with proposed districts is Annexed.

3. The following may be the technical activities that could be supported by the medical colleges adopting endemic districts:-

- Conduct post MDA coverage assessments (Coverage Evaluation Surveys) and engage in other monitoring activities and assessments as per need.
- Service provision for early diagnosis and treatment, surgery for hydrocoele and Management of lymphoedema to prevent both progression of disease and episodes of ADL.
- Trainings to district and sub district level service providers on management of early and chronic cases of lymphedema, management of ADL/acute attacks, skill based clinical trainings for conducting hydrocele surgeries.

O/C

by SHARMILA GUPTA, NVBDCP-SA-(SG), STATISTICAL ASSISTANT, DGHS DEPARTMENT on 30/11/2022 03:58 PM

4. In view of above, you are requested to kindly advise the State Medical Education Department and Deans of the Medical Colleges of your State to adopt an LF district so as to achieve the target and sustenance of the LF elimination efforts in the State.

With regards.

Yours sincerely,

(Rajiv Manjhi)

Encl.: As above.

स्वास्थ्य एवं परिवार कल्याण मन्त्रालय, भारत सरकार
NATIONAL CENTRE FOR VECTOR BORNE DISEASE CONTROL
(Directorate General of Health Services)
Ministry of Health & Family Welfare, Govt. of India

D.O. No. 8-259/2022-23/NCVBDC/ELF/Medical College Expert Group
Date: 19/12/2022

Respected Madam / Sir,

The National Centre for Vector Borne Disease Control (NCVBDC) is an apex institute under the Ministry of Health and Family Welfare and is responsible for management and control of six vector borne diseases namely Lymphatic filariasis, Kala Azar, Dengue, Chikungunya, Malaria and Japanese Encephalitis. Three diseases namely Malaria, Filaria & Kala-Azar are under the elimination programme and made substantial progress in achieving the goals. Lymphatic Filariasis (LF) commonly known as elephantiasis or *hathipaon* is endemic in 328 districts in the country. India has 55% of the global population that requires MDA. Approximately 740 million population is at risk of infection. LF is an important public health problem and is targeted for elimination by 2030.

To accelerate the elimination of Lymphatic Filariasis, medical colleges can play a vital role through their academic, research and service-delivery facilities and therefore offer an untapped opportunity to build the knowledge and skills of medical practitioners in the Lymphatic Filariasis endemic states and districts. The faculty of various departments such as Preventive and Social Medicine, Surgery, Medicine, Microbiology, Physical Medicine, and Rehabilitation offer an incredible potential for strengthening surveillance and service delivery for LF.

Hon'ble HFM desires that Medical Colleges should be actively involved in LF elimination. Accordingly, mapping of Medical Colleges with LF endemic districts was conducted and 164 medical colleges were mapped for 328 LF endemic districts (List attached as Annexure1). The terms of reference for engaging medical colleges in Lymphatic filariasis elimination program are attached as (Annexure 2).

A letter for engagement of medical colleges has already been written by JS(VBD) to Principal Secretary (Health) and MD NHM of the LF endemic States (copy enclosed).

In the view of above and to take forward the cause of elimination in the country, we would very keenly solicit the support of Principal/Dean of Medical Colleges in the above matter. You are requested to identify one faculty from each speciality and nominate one nodal officer who will be responsible for coordination from your institute with States and NCVBDC.

With warm regards.

Yours sincerely,

(Tanu Jain)

To,

The Principals of 164 medical colleges as per attached sheet.

Ref. No.: RMCH/ 192 /2023 Dated : 6th February, 2023

To,

The Director
NVBDCP
22, Shyam Nath Marg,
New Delhi.

Subject : MDA of Filariasis Experiences.

Sir,

We at Rohilkhand Medical College & Hospital, Bareilly conducted the round of MDA from 16th – 31st January, 2023, so we would like to share our experience with you.

- An IEC round was conducted from 12th January, 2023 to 15th January, 2023 in the field practicing area of Rohilkhand Medical College & Hospital, Bareilly.
- This IEC round helped in building trust and also help in positive conversion of beneficiary.
- IEC rounds were also conducted in schools & colleges for better compliance from the youth.
- Intensive training was done of the field workers so that no stone is left unturned for the success of the programme.
- The programme was intiated by inauguration of three MDA booths, one each in College, Rural Health Training Centre & Urban Health Training Centre.
- Interns & MBBS students of 2020, 2021 and 2022 batches were also involved in field activities.
- The medicines under MDA were distributed to each and every employee of the Rohilkhand Medical College & Hospital, Bareilly.

Challenges of the programme : Lack of knowledge among beneficiaries.

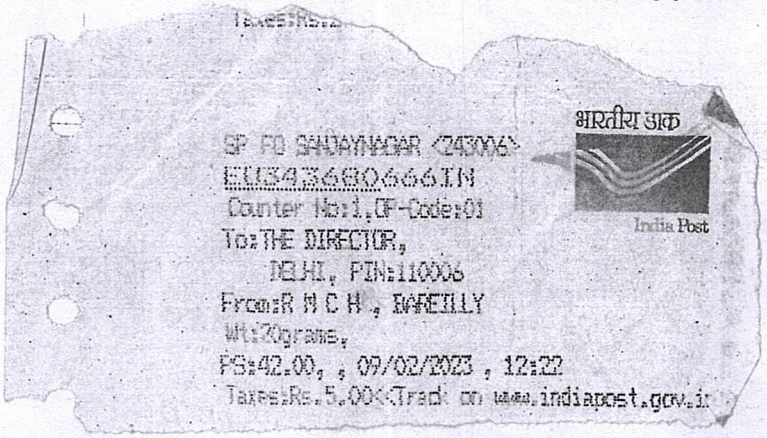

Suggestions from RMCH : To include massive IEC activities atleast 15 days prior to start of the MDA activity for better compliance.

Thanking you,

Yours Sincerely

06/02/2023

Dean/Principal

Report on MDA – Filaria

A MDA (mars clung administration) activity programme was conducted under national filarial elimination programme, by Department of Community Medicine, RMCH, and Bareilly in collaboration with NVBDCP under the age is of NUHM.

The programme was headed by Dr. Arun Singh, HOD Prof & head along with chief coordination by Dr. Medhavi Agarwal Prof & coordination by Dr. Gauri Saraswat , Asst. Prof in Community Medicine Department The field activity was divided into two parts.

(A) There was a round of IEC activities from 12th Jan 2023 till 15th Jan 2023 in the field practicing area of RMCH, which include around 10 villages' cattery around 50,000 populations. This round was done post training of the health care workers, interns of 2017 batch and volunteer students of 2020 & 2022 batch dated 11th jan 2023.

(B) There after 2nd phase of activity was conducted where in the MDA drugs which include Albendazole, Ivermectin & DEC was distributed along with collaboration of ASHA worker of various villages. From 16th jan – 31st jan 2023

Our team provided the extra support to the government set up by

Photographs and highlights of activities to be prepared for website and shown to V/S

P

enhancing IEC activities, distributing to refusers and hard to reach areas.The drug distribution was conducted in 10 adopted villages of RMCH along with the campus of BIU. Total beneficiaries were around 1600 which were benefited in the programme the drug distributors were mainly the volunteer students of 2020 MBBS batch & 2022 MBBS batch.

The field response was mixed but after constant IEC activities majority of the refusers were converted to acceptors of drugs

We are really thankful to RMCH, Principal Dr. Digvijay Singh for providing us this opportunity & to our beneficiaries for giving us the great repose

ROHILKHAND MEDICAL COLLEGE AND HOSPITAL

BAREILLY (UP)

Rohilkhand medical college and Hospital Bareilly organized **WORLD BREASTFEEDING WEEK** with a view to create awareness among mother's practice, emphasize and educate exclusive breast feeding.

The department of community medicine in collaboration with department of pediatrics is celebrating "World Breastfeeding Week" from 1st to 7th August 2023. The theme is "Enabling Breastfeeding" (Making a difference for working parents). We have week long programme during which various events have been organized for awareness on breastfeeding .

The programme was held under the guidance of faculty of community medicine **Prof and HOD Dr Arun Singh, Dr Medhavi Agarwal, Dr Rashmi Katyal and Dr Gauri Saraswat,** alongwith faculty of pediatrics **Prof and HOD Dr Prasad Nayak N, Dr Preeti Lata Rai,** interns and medical social workers(MSW).

The whole event was successful and it's a team effort. This event would not been possible without the support of our **Prof and Dean Dr Digvijay Singh.**

S.no.	Activity / date	Activity details	Suggested audience
1.	**Quiz** (01/08/2023)	Quiz on breastfeeding was conducted for post graduates and interns of dept. Pediatrics, OBGY, and community medicine. The winners were ~~interns~~ PG of dept. OBGY and the runners up were interns.	HOD of respective dept. ,faculties, postgraduates and interns from clinical, para-clinical dept.
2.	**Health education** (02/08/2023)	In **Rural Health Centre,** health education was given by the faculty of community medicine and pediatrics. Some of the important messages given were: • Exclusive breastfeeding for about 6 months and continue for atleast the second year. • Initiation of breastfeeding should be encouraged as soon as possible after the birth, ideally within 1 hour. • Complementary foods rich in iron should be introduced at about 6 months of age.	General public.
3.	**Nukkad natak** (02/08/2023)	In **Darbarilal inter college**, nukkad natak was done by medical interns. All the interns took part enthusiastically and performed small individual plays. Some of the important messages given in the play were: • No adulteration should be done with breast milk. • Mother and infant should sleep in proximity to each other to facilitate breastfeeding. • Colostrum should be the first food of newborn as it boosts immunity and prevent allergies and infections.	College students and teachers.

Scanned with CamScanner

4.	**Health education** (03/08/2023)	In **Urban Health Centre,** health education was given by the faculty of community medicine and pediatrics. Some of the important messages given were: • Breastfeeding is the best possible nutrition to the newborn. • Breastfeeding reduces the incidence of various diseases. • It helps in developing the maternal-infant bond.	General public.
5.	**Poster/slogan competition** (04/08/2023)	In **department of community medicine and pediatrics** along with **keshlata college of nursing**, poster and slogan competition was conducted on the theme enabling breast feeding. [2 nursing students declared winners)	All nursing students, faculties, doctors, and UG students.
6.	**Nukkad natak** (04/08/2023)	In **Urban Health Centre,** nukkad natak was done by medical interns. All the interns took part enthusiastically and performed small individual plays. Some of the important messages given in the play were: • Baby's mouth should be wide open and the lower lip should be curled outward. • The lower portion of the areola should not be visible. • Breastfeeding reduces the risk of breast, ovarian and endometrial carcinoma.	General public.
7.	**Nukkad natak** (05/08/2023)	In **Keshlata International School,** nukkad natak was done by medical interns. Prof and HOD Dr. Arun Singh and all the faculty of community medicine department and interns were present. Some of the important messages given in the play were: • Initiation of breastfeeding should be encouraged as soon as possible after the birth, ideally within 1 hour. • Complementary foods rich in iron should be introduced at about 6months of age. • Baby's mouth should cover whole of the areola.	Faculty and school students.
8.	**Nukkad natak** (07/08/2023)	In **Rural Health Centre,** nukkad natak was done by medical interns. All the interns took part enthusiastically and performed small individual plays. Some of the important messages given were: • Exclusive breastfeeding should be done for 6 months and should be continued for atleast second year. • No adulteration should be done with breast milk. • Colostrum should be the first food of	General public.

Activity Report: World Breastfeeding Week (1st – 7th August)

Organized by: Department of Pediatrics
Venue: Departmental Demonstration Room, Rohilkhand Medical College and Hospital, Bareilly
Date: 07/08/25
Theme: Prioritise Breastfeeding: Create Sustainable Support Systems
Speaker: Dr.Preeti Lata Rai (Head Of Department Of Pediatrics)
Attendees: Faculty Members, Senior Residents, Postgraduate Students

The Department of Pediatrics, Rohilkhand Medical College and Hospital, Bareilly, organized a series of activities to commemorate **World Breastfeeding Week (WBW) from 1st to 7th August 2025**, in alignment with this year's theme **"Prioritise Breastfeeding: Create Sustainable Support Systems."** The celebrations aimed to raise awareness on the importance of breastfeeding, engage healthcare professionals and students, and sensitize the community towards creating a supportive environment for mothers and infants.

The week was inaugurated on **1st August 2025** with an enlightening session led **by Dr. Preeti Lata Rai,** Professor and Head of Pediatrics. She delivered a comprehensive lecture on the objectives of WBW, emphasizing breastfeeding as a shared societal responsibility and introducing key government initiatives such as the MAA Programme, Mothers' Own Milk (MOM), and the Baby-Friendly Hospital Initiative (BFHI) OBJ.

On **2nd August**, a **Debate competition** on the topic "Breastfeeding is the Right of Every Baby" was organized for junior residents. The debate highlighted both the unquestionable benefits of breastfeeding and the real-world challenges mothers face, such as health conditions, mental stress, and socio-economic barriers. The session enriched participants with scientific, ethical, and cultural perspectives on breastfeeding OBJ.

The celebrations continued with a **skit performance** on **4th August** near the OPD. Executed by first-year junior residents, the skit vividly portrayed real-life situations emphasizing the nutritional, immunological, and emotional benefits of breastfeeding,

as well as common myths and challenges. The event was attended by patients, their attendants, and faculty, making it an effective community engagement activity .

On **5th August**, an interdepartmental **quiz competition** was organized in collaboration with the Department of Obstetrics & Gynaecology. Teams of junior residents participated enthusiastically, answering rapid-fire, visual, and scenario-based questions. This interactive event fostered collaboration and enriched knowledge-sharing between departments while reinforcing the role of healthcare providers in supporting breastfeeding .

The focus shifted to the community on **6th August, with an awareness programme at the Rural Health Training Centre (RHTC), Rithora**. Dr. Swati Verma, Junior Resident, addressed local mothers, ASHA workers, and health staff on early initiation, exclusive breastfeeding, and sustained feeding practices. Posters and visual aids were displayed to simplify key messages, while misconceptions prevalent in rural settings were effectively addressed .

The week concluded on **7th August** with a grand event attended by dignitaries including **Dr. Digvijay Singh, Dean/Principal,** and **Dr. Rajnish Pathania, Medical Superintendent**. The finale featured skit, quiz, and debate competitions, showcasing the creativity, knowledge, and commitment of students. Winners were felicitated, and the dignitaries highlighted the importance of breastfeeding in reducing infant mortality and improving maternal health outcomes .

Overall, the week-long celebration was marked by academic discussions, community outreach, cultural performances, and interactive competitions. It successfully reinforced the theme of building sustainable support systems for breastfeeding through medical education, institutional commitment, and community awareness. The Department of Pediatrics reaffirmed its pledge to continue advocating for breastfeeding as a cornerstone of child survival and maternal well-being.

etc. to rural poor, marginalized and needy, especially in un-served and under-served region. Some of the notable donations were, Food Donations during corona pandemic by our university; Donations for procuring grass and animal feed.

Thus, the university aims at laying down a strong foundation for the best medical professionals in the country who are morally strong and have a highly dedicated work culture and will be continuing various institutional social responsibility activities in the neighborhood community in terms of education, environmental issues, health and hygiene awareness, delivery of free / subsidized health care and socio- economic development issues.

INSTITUTIONAL SOCIAL RESPONSIBILITY (ISR) ACTIVITIES POLICY

Objective

To define a framework for planning, implementing, and documenting Institutional Social Responsibility (ISR) activities that address neighborhood community needs, with a focus on education, environmental issues, health and hygiene awareness, subsidized healthcare delivery, and socio-economic development. The policy also governs the documentation of expenditures incurred in these activities.

Scope

This policy applies to all faculty, staff, and students of the university engaged in ISR activities benefiting the surrounding community.

Definition of Terms

1. **Institutional Social Responsibility (ISR)**: Activities undertaken by the university to contribute to the well-being and sustainable development of the local community.
2. **Neighborhood Community**: Local communities within a defined radius of the university's campus, as determined by the university administration.
3. **ISR Activities**: Programs or initiatives addressing:
    - **Education**: Literacy programs, educational workshops, and skill development.
    - **Environmental Issues**: Cleanliness drives, tree plantations, and Swachh Bharat initiatives.
    - **Health and Hygiene Awareness**: Health camps, menstrual hygiene awareness, sanitation promotion.
    - **Healthcare Delivery**: Free or subsidized medical camps and telemedicine services.
    - **Socio-Economic Development**: Vocational training, women empowerment, and financial literacy programs.

Objectives of ISR Activities

1. To strengthen the university's role in community development.
2. To foster social responsibility among students and staff.
3. To support sustainable development goals in the neighborhood.
4. To document and ensure transparency in the expenditure incurred.

Guidelines for ISR Activities

1. **Planning and Implementation**:
    - The university will establish an ISR Committee (ISRC) to oversee all ISR activities.
    - Activities should be planned in consultation with the neighborhood community to address their specific needs.
    - Efforts should align with the university's vision of promoting sustainable development.

2. **Participation**:
    - Students and staff must actively participate in ISR activities as part of their academic and professional development.
    - Participation may be voluntary or integrated into curricular and co-curricular programs.
3. **Funding and Expenditure**:
    - The university will allocate an annual budget for ISR activities.
    - Any external funding or donations must comply with university policies.
    - Accurate records of all expenditures, including receipts, must be maintained.
4. **Collaboration**:
    - Partnerships with local government bodies, NGOs, and other organizations are encouraged to maximize impact.

Documentation and Reporting

1. **Activity Documentation**:
    - Each ISR activity must be documented with:
        - Objectives and expected outcomes.
        - Participant details.
        - Evidence of implementation (e.g., photographs, attendance lists, and reports).
        - Expenditure incurred.
2. **Reporting**:
    - The ISRC will compile an annual ISR report summarizing:
        - Activities conducted.
        - Number of beneficiaries.
        - Impact assessment.
        - Total expenditure incurred.
    - The report will be submitted to the university administration and shared with stakeholders.

Monitoring and Evaluation

1. **Evaluation Metrics**:
    - Number of activities conducted.
    - Number of beneficiaries.
    - Community feedback on impact.
    - Funds utilized effectively.

2. **Impact Assessment:**
    - The ISRC will conduct periodic evaluations to assess the short-term and long-term impact of ISR activities on the community.

Responsibilities

1. **ISR Committee (ISRC):**
    - Plan and oversee ISR initiatives.
    - Ensure compliance with this policy.
    - Maintain financial and activity records.
2. **Faculty and Staff:**
    - Actively engage in planning and implementing ISR activities.
    - Encourage student participation.
3. **Students:**
    - Participate in ISR activities as part of their overall development.
4. **University Administration:**
    - Provide financial and administrative support for ISR activities.
    - Recognize and reward outstanding contributions to ISR efforts.

Review and Amendments

This policy will be reviewed biennially to incorporate feedback, align with changing community needs, and ensure the university continues to fulfill its social responsibility effectively.

3.6.3
3.6.4

RECOGNITION OF AWARDS AND OUTREACH ACTIVITIES POLICY

Objective

To establish clear guidelines for identifying, documenting, and reporting awards and recognitions received by faculty, staff, and students for extension and outreach activities from government or other recognized bodies.

Scope

This policy applies to all faculty members, staff, and students of the university who participate in extension and outreach activities and receive awards or recognitions from government organizations, professional bodies, or recognized institutions.

Definition of Terms

1. **Extension and Outreach Activities**: Programs and initiatives designed to serve society by addressing community needs, such as education, health, environment, and social welfare.
2. **Award and Recognition**: A formal acknowledgment or certificate issued by a government body, professional society, or recognized organization for outstanding contributions in extension and outreach activities.
3. **Recognized Bodies**: Government agencies, statutory bodies, international organizations, academic institutions, NGOs, and other officially registered organizations.

Criteria for Inclusion

1. **Eligibility**:
    - The activity must align with the university's vision and mission.
    - The award must be directly related to the individual's or team's contribution to outreach and extension programs.
    - The recognition must be from a legitimate and recognized body.
2. **Documentation Requirements**:
    - Certificate, plaque, or formal letter issued by the awarding body.
    - Proof of participation in the activity (e.g., reports, photographs, publications).
    - A brief summary of the activity highlighting its objectives, outcomes, and societal impact.
3. **Verification Process**:
    - The university's Internal Quality Assurance Cell (IQAC) or designated committee will verify the authenticity of the award and the awarding body.

Application and Reporting Process

1. **Submission**:
    - Individuals must submit their awards or recognitions to the university's designated office or online portal within 30 days of receipt.
    - Required documents include:
        - A scanned copy of the award or recognition certificate.

- A detailed report of the outreach activity.
- Contact information for the awarding body.

2. **Review and Approval:**
    - The IQAC or a designated committee will review the submission to ensure it meets the criteria.
    - Approved entries will be recorded in the university's database of awards and recognitions.
3. **Annual Reporting:**
    - An annual report will be prepared summarizing the awards received by the university community.
    - The report will be published on the university's official website and included in accreditation and ranking submissions.

Responsibilities

1. **Faculty and Staff:**
    - Actively participate in and support extension and outreach activities.
    - Submit accurate and timely documentation for awards received.
2. **IQAC:**
    - Maintain a centralized database of all awards and recognitions.
    - Verify and validate the authenticity of the awards.
3. **University Administration:**
    - Encourage participation in outreach activities through policy support and incentives.
    - Recognize and reward individuals or teams for outstanding achievements in this area.

Review and Amendments

This policy will be reviewed periodically to ensure its relevance and alignment with evolving standards and university goals. Amendments may be proposed by the IQAC and approved by the university's governing body.

Activity Report

Date: 06.10.22

Title of the Activity: Awareness Program on Environment and Tea Plantation

Date & Venue:

- **Date**: 05.10.22
- **Venue:** Rithora Village

Organized by:

Department of Community Medicine, Rohilkhand Medical College and Hospital , NSS Unit Bareilly International university

Objectives:

- To create awareness about the environmental significance of sustainable tea plantation practices.
- To understand the relationship between agriculture, biodiversity, and ecological balance.
- To highlight the role of tea plantations in local economies, livelihoods, and environmental conservation.
- To encourage environmentally friendly practices in plantation areas, focusing on soil health, water use, and organic methods
- To reduce air pollution by absorbing carbon dioxide and and releasing oxygen .
- To provide areas for outdoor activities and relaxation .

Resource Person(s):

1. Dr. Arun singh **(Head of department Community Medicine)**
2. Dr. Medhavi Agarwal
3. Dr. Deepak Upadhyay

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)

Email: info@biu.edu.in Website: www.biu.edu.in

Description:

- The program focused on exploring the environmental and ecological aspects of tea plantations and their impact on local sustainability.
- It began with an introductory session on the history and significance of tea cultivation in India and its connection to rural livelihood .
- Participants were educated about eco-friendly farming methods, prevention of soil erosion, biodiversity conservation, and the use of organic fertilizers in tea plantations.
- Speakers emphasized the environmental challenges posed by conventional farming, such as chemical runoff and deforestation, and introduced sustainable solutions.
- A field demonstration or visual presentation (depending on venue) showcased proper plantation techniques and conservation practices. The event also covered the health aspects of plantation workers, including occupational health, safe pesticide handling, and access to sanitation.
- An interactive discussion allowed students and attendees to share their views on climate change, land use, and community involvement in protecting green spaces
- Community Involvement: The program involved active participation from local villagers, students, and faculty members, fostering a sense of shared responsibility for environmental conservation.
- Interactive Sessions: A dedicated Q&A session allowed attendees to clarify doubts, share their perspectives, and discuss innovative approaches to eco-friendly agriculture.

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)
Rohilkhand Medical College Campus, Pilibhit Bypass Road, Bareilly-243006 (U.P.) INDIA
Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

Outcomes:

- Enhanced awareness of the environmental impacts and benefits of sustainable tea plantations.
- Promotion of eco-conscious farming among students and local participants.
- Integration of environmental health topics into academic and community outreach activities.
- Encouraged adoption of environmentally sound practices in plantation areas.
- Strengthened understanding of the link between environmental conservation, agriculture, and health.

Activity Report

Date: 11.10.2022

Title of the Activity: Voluntary Blood Donation Camp

Date & Venue:

- **Date:** 10.10.2022
- **Venue:** Rithora Village

Organized by:

Department of Community Medicine, in collaboration with the Department of Pathology and RMCH Blood Bank, NSS Unit Bareilly International University

Objectives:

- To encourage voluntary blood donation among students, staff, and the community.
- To raise awareness about the importance and safety of blood donation.
- To ensure a steady and safe supply of blood for emergency medical needs.
- To promote altruism and social responsibility among medical students and healthcare professionals.

Resource Person(s):

1. Dr. Arun singh **(Head of department Community Medicine)**
2. Dr. Medhavi Agarwal
3. Dr. Deepak Upadhyay

BAREILLY INTERNATIONAL UNIVERSITY

(Established Under Govt. of U.P. Act 26 of 2016)

Description:

Personal Hygiene Practices

Personal hygiene is essential for maintaining physical and mental well-being. Good hygiene practices help prevent the spread of illnesses, boost confidence, and promote overall health.

Key Practices:

1. Hand Hygiene: Wash hands frequently with soap and water, especially after using the restroom, before eating, and after blowing your nose, coughing or sneezing.
2. Bathing and Showering: Regularly bathe or shower to maintain personal cleanliness and freshness.
3. Oral Hygiene: Brush teeth at least twice a day and floss once a day to prevent tooth decay and gum disease.
4. Hair Care: Regularly wash and condition hair to maintain cleanliness and prevent oil buildup.
5. Nail Care: Keep fingernails and toenails clean and trimmed to prevent dirt accumulation and nail biting.
6. Foot Care: Wash feet daily and dry them thoroughly, especially between the toes, to prevent fungal infections.

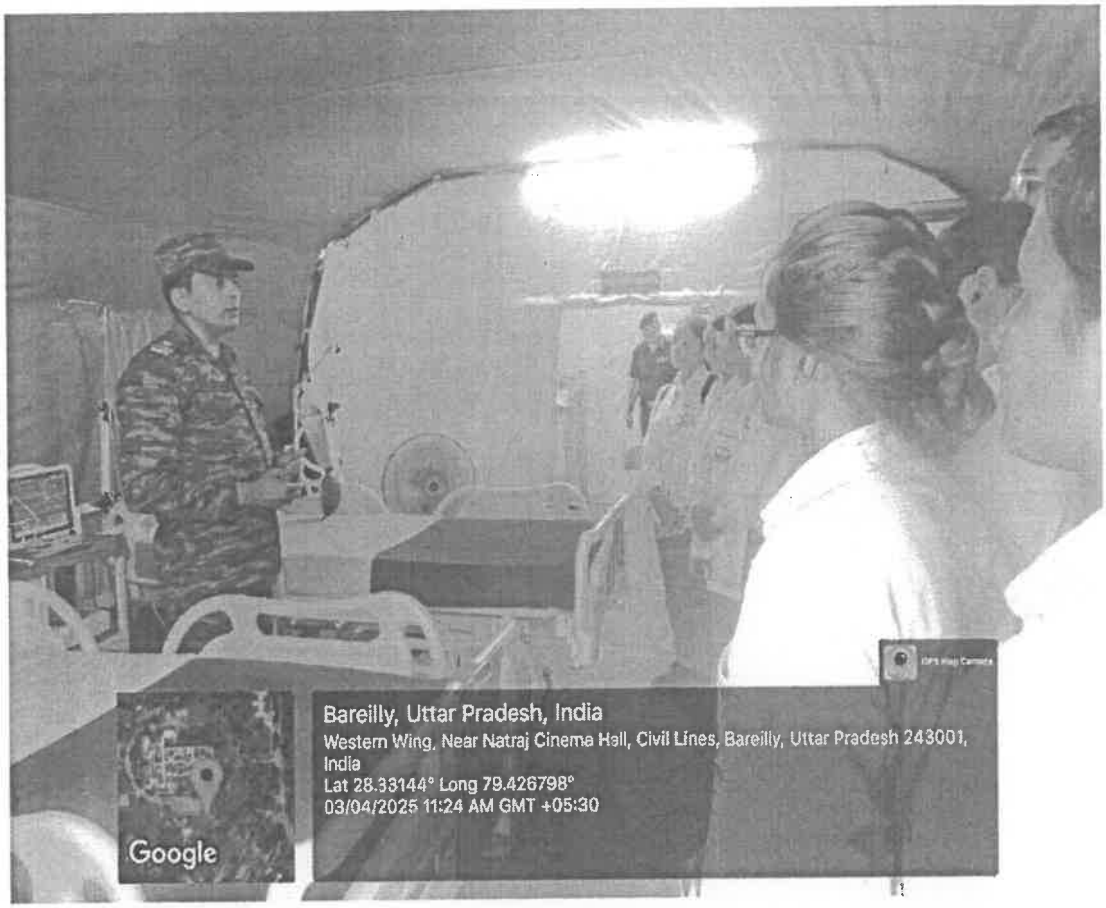

Benefits:

1. Prevents Illnesses: Good hygiene practices help prevent the spread of infections and diseases.
2. Boosts Confidence: Personal hygiene can enhance self-esteem and confidence.
3. Promotes Health: Good hygiene practices contribute to overall physical and mental well-being.

By incorporating these practices into daily routines, individuals can maintain good personal hygiene and enjoy better health and well-being.

Email: info@biu.edu.in Website: www.biu.edu.in

Real-life examples and simple language were used to ensure clarity and relevance. The session concluded with an open Q&A, allowing participants to clarify doubts related to hygiene practices and preventive healthcare

Outcomes:

- Improved knowledge among participants regarding personal hygiene and its impact on health.
- Better understanding of preventive practices related to water, sanitation, and hygiene (WASH).
- Increased interest in adopting daily hygienic practices at home and in the community.
- Active involvement of medical students in health education and outreach.
- Strengthening of the role of RMCH in promoting public health at the grassroots level

Title of the Activity: Swachh Bharat Abhiyan – Cleanliness Drive and Awareness Campaign

Date & Venue:

•Date: 22.11.2022

•Venue: Community health Centre, Rithora Chandpur Bichpuri

Organized by:

Department of Community Medicine, Rohilkhand Medical College and Hospital NSS unit, Bareilly International university

Objectives:

- To promote awareness regarding cleanliness, hygiene, and sanitation among students, faculty, and the community.
- To instill a sense of responsibility towards maintaining a clean environment.
- To eliminate open defecation by constructing individual household toilets and public toilets.
- To improve solid waste management by encouraging cities to prepare detailed project reports.
- To promote behavioral change through education and community-led total sanitation approaches
- To increase awareness about sanitation and hygiene practices among citizens.
- To actively engage students and staff in cleaning activities as part of the national Swachh Bharat Abhiyan initiative.
- To educate the community on waste segregation, safe sanitation practices, and disease prevention linked to poor hygiene.

Description:

Importance of Cleanliness

Join us for an engaging workshop on the importance of cleanliness, where we'll explore the impact of cleanliness on our health, environment, and communities. Through interactive discussions and activities, participants will gain a deeper understanding of the benefits of cleanliness and learn practical strategies for maintaining cleanliness in their daily lives.

Key Takeaways:

- Understand the importance of cleanliness for public health and environmental sustainability
- Learn effective strategies for waste management and personal hygiene
- Discover ways to promote cleanliness in communities and workplaces
- Develop skills for sustaining cleanliness habits and promoting a culture of cleanliness

Who Should Attend:

- Community leaders
- Students
- Workplace professionals
- Anyone interested in promoting cleanliness and sustainability

Outcomes:

- Increased awareness of the importance of cleanliness
- Improved knowledge of cleanliness practices and strategies
- Enhanced skills for promoting cleanliness in communities and workplaces

Let's work together to promote a culture of cleanliness and create a healthier, more sustainable environment for all.

BAREILLY INTERNATIONAL UNIVERSITY

Email: info@biu.edu.in Website: www.biu.edu.in

The event was marked by enthusiastic participation and community interaction, encouraging a collective effort toward maintaining cleanliness and hygiene in daily life.

Outcomes:

- Significant Reduction in Open Defecation: India's open defecation rate decreased from 73% in 2000 to 11% in 2022, with 96.5% of rural households having toilets.
- Construction of Toilets: Over 90 million toilets were built between 2014 and 2019, with 10.9 crore individual household latrines constructed.
- Open Defecation-Free Villages: Over 603,175 villages were declared open defecation-free as of January 2020.

Activity Report

DATE- 05.01.2023

TITLE OF ACTIVITY: Free health check up and immunization status awareness

DATE AND VENUE

- **DATE**- 04.01.2023
- **VENUE**- Primary Health Centre, Rithora

ORGANIZED BY

Organized by the Department of Community Medicine, Rohilkhand Medical College and Hospital, Bareilly international university.

OBJECTIVES

- **Enhancing Healthcare Access**: By organizing free health checkup camps, RMCH aims to provide medical services to underserved populations, ensuring that individuals who may not have access to regular healthcare facilities receive necessary medical attention.
- **Promoting Health Awareness**: These camps serve as platforms to educate the community about prevalent health issues, preventive measures, and the importance of regular health checkups, thereby fostering a culture of health awareness.
- **Early Detection of Health Conditions**: The camps facilitate the early identification of health conditions, enabling timely intervention and treatment, which can significantly improve health outcomes.
- **Community Engagement and Support**: Through these initiatives, RMCH engages with the local community, building trust and providing support to individuals in need of medical care.

RESOURCE PERSON(S)

1) Dr Arun singh **(Head of department Community Medicine)**
2) Dr Swati Khan
3) Dr Deepak Sharma

BAREILLY INTERNATIONAL UNIVERSITY

Phone: 0581-2526011-12, Fax: 0581 - 2303345

Email: info@biu.edu.in Website: www.biu.edu.in

DESCRIPTION

- The primary goal of these health checkup camps is to make healthcare accessible to all, especially to those who cannot afford or reach regular medical facilities. Through these camps, RMCH seeks to promote early diagnosis, raise awareness about common diseases, and encourage a preventive approach to health. The camps also aim to spread knowledge about hygiene, nutrition, and lifestyle diseases, which are becoming increasingly common in both rural and urban populations.

- **Services Provided-** During these free health camps, a wide range of services are provided. These include general health checkups, blood pressure and sugar level testing, eye checkups, dental screening, gynecological consultations, and pediatric care. In some cases, basic diagnostic tests are also carried out on-site. Patients who require specialized care are referred to RMCH for further treatment, often at subsidized rates or even free of cost in deserving cases.

- **Community Impact-** The impact of these camps has been far-reaching. Many individuals who were previously unaware of their health conditions have benefited through early diagnosis and timely medical intervention. In rural areas, these camps serve as the only point of contact with professional healthcare for many families. Additionally, they help reduce the burden on government health services by addressing minor health issues at the community level.

- These camps also serve as a practical training ground for RMCH's medical students and interns. Under the supervision of senior doctors and faculty, students engage with patients, conduct examinations, and gain invaluable field experience. This not only enhances their clinical skills but also instills in them a sense of responsibility toward society.

1. Early Detection of Diseases

One of the most important outcomes of these camps is the early diagnosis of various health issues such as diabetes, hypertension, anemia, malnutrition, eye problems, dental issues, and even potentially serious conditions like tuberculosis or cancer. Early detection enables timely treatment and better health outcomes.

2. Increased Health Awareness

These camps play a vital role in spreading awareness about personal hygiene, sanitation, lifestyle diseases, and nutrition. Many people attending the camps become more informed about maintaining their health, leading to healthier habits and a preventive approach to disease.

3. Improved Access to Healthcare

The camps bridge the gap between medical services and rural or low-income populations who otherwise may not be able to afford or access proper healthcare. Many people receive consultations, medications, and referrals free of cost, reducing financial barriers to treatment.

4. Strengthening Doctor-Patient Relationships

The free health checkups help build trust between the community and medical professionals. People feel more connected and confident in seeking help from RMCH, knowing they will be treated with care and respect.

Phone: 0581-2526011-12, Fax: 0581 - 2303345

Email: info@biu.edu.in Website: www.biu.edu.in

5. Training and Exposure for Medical Students

For the students and interns of RMCH, these camps offer practical exposure to real-world healthcare challenges. They learn how to interact with patients from diverse backgrounds, improving both their clinical skills and their sense of social responsibility.

6. Community Empowerment

By engaging with the public and encouraging regular checkups, these camps promote self-responsibility for health. Families start understanding the importance of early care and are more likely to seek help in the future, reducing dependency on emergency care.

7. Follow-up and Referral Support

Many patients identified with serious conditions during these camps are referred to RMCH for further investigation or treatment, often at low or no cost. This follow-up care ensures continuity in treatment and a better chance at recovery.

TITLE OF ACTIVITY: Campaign for Zebra Crossing Usage and signal discipline

DATE AND VENUE

- **DATE**- 26.01.2023
- **VENUE**- Primary Health Centre, Rithora

ORGANIZED BY

Organized by the Department of Community Medicine, Rohilkhand Medical College and NSS Unit Bareilly International University

OBJECTIVES

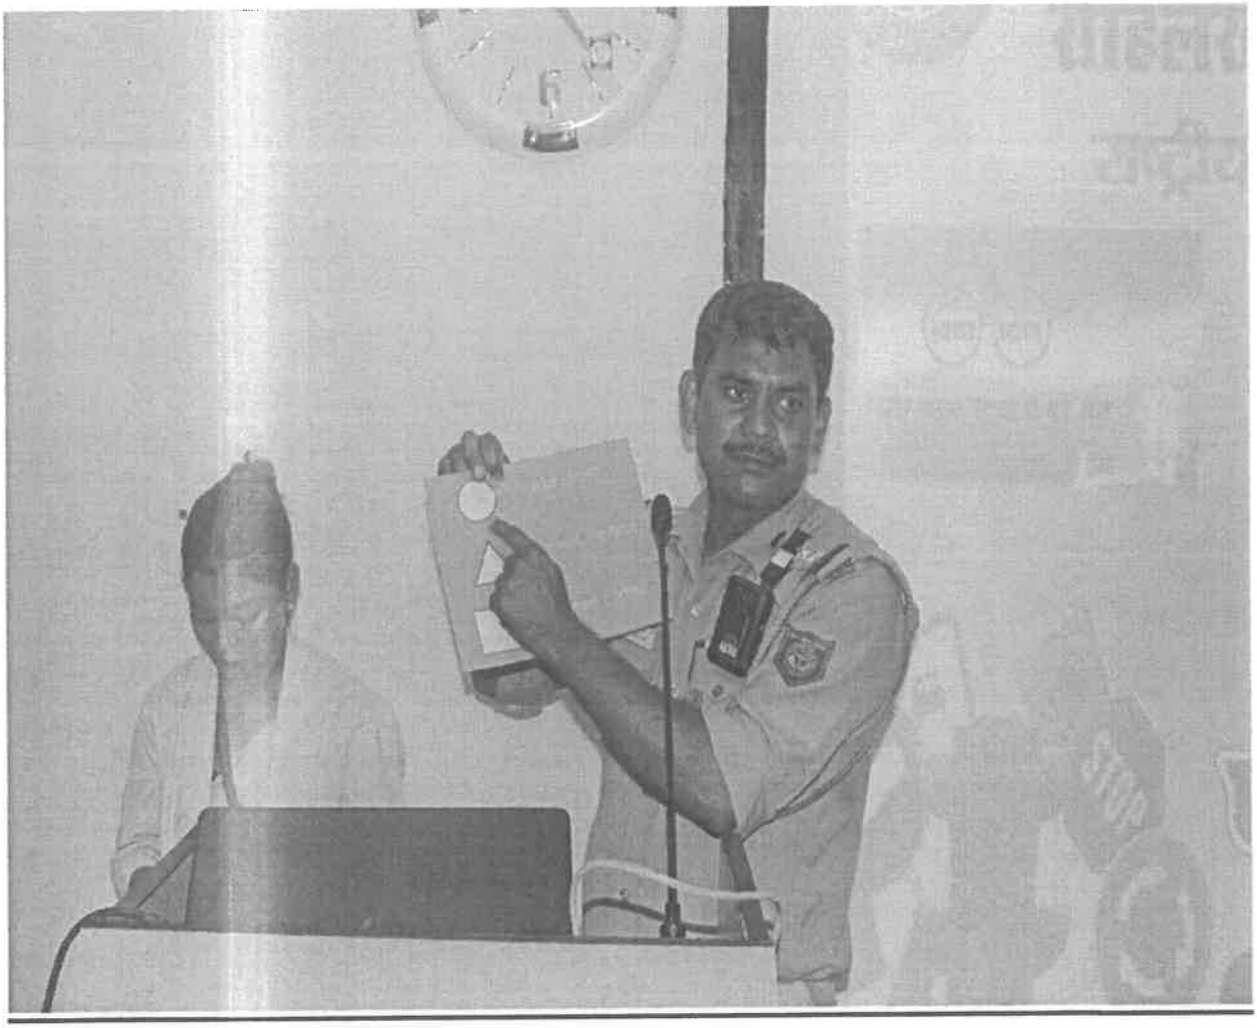

1. To raise public awareness about the dangers and legal consequences of driving under the influence of alcohol.
2. To educate individuals, especially youth and drivers, about the impact of drunk driving on road safety and public health.
3. To promote responsible behavior and encourage alternative options like designated drivers or ride services to promote for the road safety in the society .
4. To highlight real-life consequences through case studies, survivor stories, or statistical data to evoke emotional and rational understanding.
5. To advocate for stricter enforcement of DUI laws and community participation in preventing such incidents.

RESOURCE PERSON(S)

1) Dr Arun singh **(Head of department Community Medicine)**
2) Dr Swati Khan
3) Dr Deepak Sharma

Email: info@biu.edu.in Website: www.biu.edu.in

DESCRIPTION

Raising Public Awareness

The primary objective is to educate the general public, especially youth and vehicle drivers, about the dangers of impaired driving. Through campaigns, workshops, and community events, the program spreads awareness about how even a small amount of alcohol can impair judgment and reaction time.

Promoting Responsible Behavior

The initiative encourages responsible choices such as using public transport, hiring cabs, or appointing a designated driver after consuming alcohol. Public participation and behavioral change are key goals.

BAREILLY INTERNATIONAL UNIVERSITY

Email: info@biu.edu.in Website: www.biu.edu.in

Real-Life Impact and Education

By sharing stories from survivors, families of victims, and law enforcement personnel, the program delivers an emotional and realistic perspective on the consequences of drunk driving. Statistics and visual demonstrations reinforce the message.

Legal and Social Consequences

Participants are informed about the strict penalties for DUI offenses—fines, imprisonment, license suspension, and social stigma. The program also promotes community involvement to support preventive measures and ensure safer roads for all.

Activity Report

Date: 03.11.23

Title of the Activity: Awareness Program on Environment and Tea Plantation

Date & Venue:

- **Date**: 02.11.23
- **Venue:** Rithora Village

Organized by:

Department of Community Medicine, Rohilkhand Medical College and Hospital , NSS Unit Bareilly International university

Objectives:

- To create awareness about the environmental significance of sustainable tea plantation practices.
- To understand the relationship between agriculture, biodiversity, and ecological balance.
- To highlight the role of tea plantations in local economies, livelihoods, and environmental conservation.
- To encourage environmentally friendly practices in plantation areas, focusing on soil health, water use, and organic methods
- To reduce air pollution by absorbing carbon dioxide and and releasing oxygen .
- To provide areas for outdoor activities and relaxation .

Description:

- The program focused on exploring the environmental and ecological aspects of tea plantations and their impact on local sustainability.
- It began with an introductory session on the history and significance of tea cultivation in India and its connection to rural livelihood .
- Participants were educated about eco-friendly farming methods, prevention of soil erosion, biodiversity conservation, and the use of organic fertilizers in tea plantations.
- Speakers emphasized the environmental challenges posed by conventional farming, such as chemical runoff and deforestation, and introduced sustainable solutions.
- A field demonstration or visual presentation (depending on venue) showcased proper plantation techniques and conservation practices. The event also covered the health aspects of plantation workers, including occupational health, safe pesticide handling, and access to sanitation.
- An interactive discussion allowed students and attendees to share their views on climate change, land use, and community involvement in protecting green spaces
- Community Involvement: The program involved active participation from local villagers, students, and faculty members, fostering a sense of shared responsibility for environmental conservation.
- Interactive Sessions: A dedicated Q&A session allowed attendees to clarify doubts, share their perspectives, and discuss innovative approaches to eco-friendly agriculture.

Email: info@biu.edu.in Website: www.biu.edu.in

Outcomes:

- Enhanced awareness of the environmental impacts and benefits of sustainable tea plantations.
- Promotion of eco-conscious farming among students and local participants.
- Integration of environmental health topics into academic and community outreach activities.
- Encouraged adoption of environmentally sound practices in plantation areas.
- Strengthened understanding of the link between environmental conservation, agriculture, and health.

Activity Report

Date: 16.11.2023

Title of the Activity: Voluntary Blood Donation Camp

Date & Venue:

- **Date:** 15.11.2023
- **Venue:** Rithora Village

Organized by:

Department of Community Medicine, in collaboration with the Department of Pathology and RMCH Blood Bank, NSS Unit Bareilly International University

Objectives:

- To encourage voluntary blood donation among students, staff, and the community.
- To raise awareness about the importance and safety of blood donation.
- To ensure a steady and safe supply of blood for emergency medical needs.
- To promote altruism and social responsibility among medical students and healthcare professionals.

Resource Person(s):

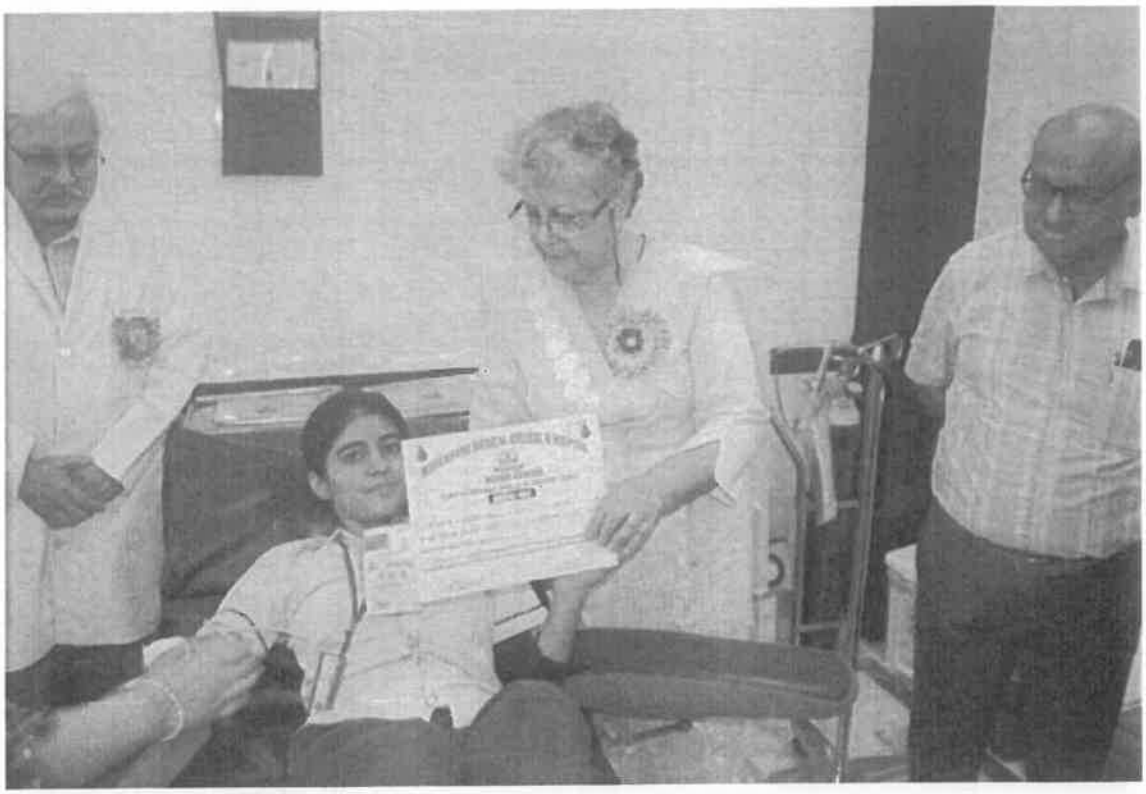

1. Dr. Arun singh **(Head of department Community Medicine)**
2. Dr. Medhavi Agarwal
3. Dr. Deepak Upadhyay

Description:

Personal Hygiene Practices

Personal hygiene is essential for maintaining physical and mental well-being. Good hygiene practices help prevent the spread of illnesses, boost confidence, and promote overall health.

Key Practices:

1. Hand Hygiene: Wash hands frequently with soap and water, especially after using the restroom, before eating, and after blowing your nose, coughing or sneezing.
2. Bathing and Showering: Regularly bathe or shower to maintain personal cleanliness and freshness.
3. Oral Hygiene: Brush teeth at least twice a day and floss once a day to prevent tooth decay and gum disease.
4. Hair Care: Regularly wash and condition hair to maintain cleanliness and prevent oil buildup.
5. Nail Care: Keep fingernails and toenails clean and trimmed to prevent dirt accumulation and nail biting.
6. Foot Care: Wash feet daily and dry them thoroughly, especially between the toes, to prevent fungal infections.

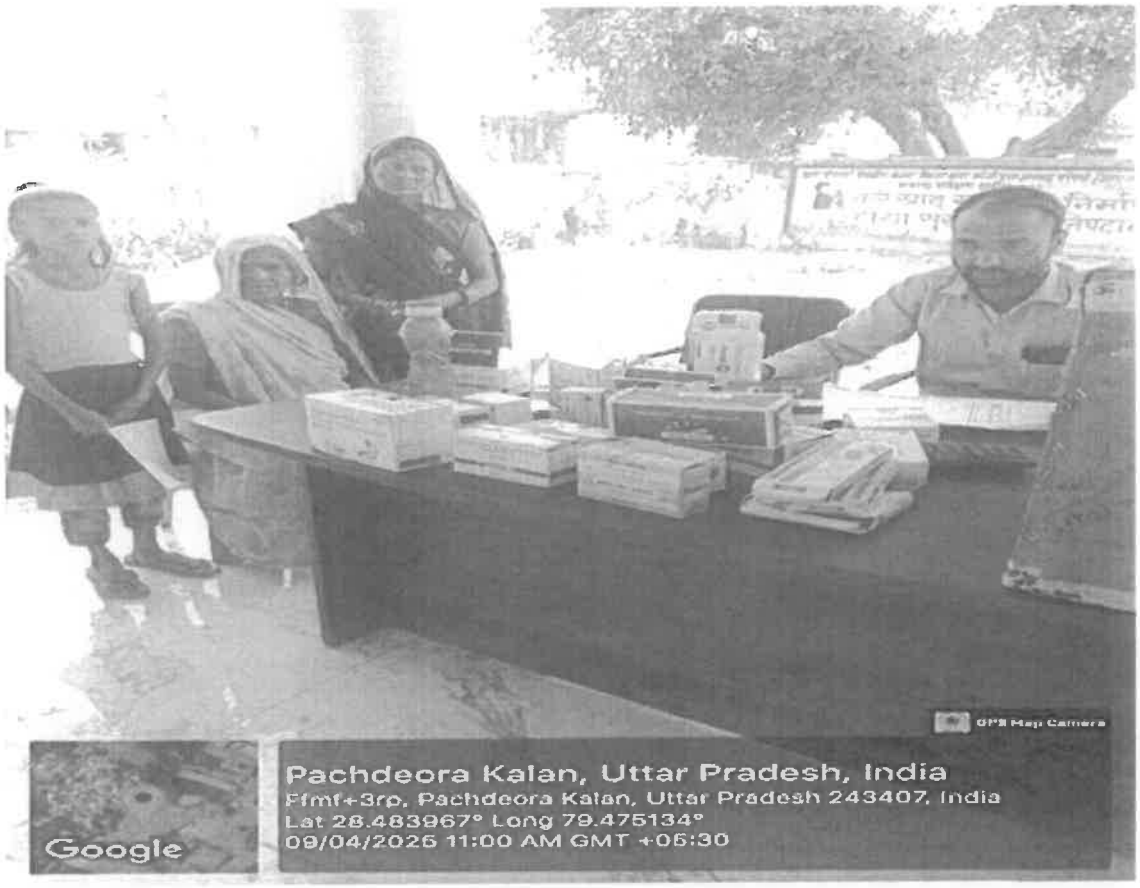

Benefits:

1. Prevents Illnesses: Good hygiene practices help prevent the spread of infections and diseases.
2. Boosts Confidence: Personal hygiene can enhance self-esteem and confidence.
3. Promotes Health: Good hygiene practices contribute to overall physical and mental well-being.

By incorporating these practices into daily routines, individuals can maintain good personal hygiene and enjoy better health and well-being.

Real-life examples and simple language were used to ensure clarity and relevance. The session concluded with an open Q&A, allowing participants to clarify doubts related to hygiene practices and preventive healthcare

Outcomes:

- Improved knowledge among participants regarding personal hygiene and its impact on health.
- Better understanding of preventive practices related to water, sanitation, and hygiene (WASH).
- Increased interest in adopting daily hygienic practices at home and in the community.
- Active involvement of medical students in health education and outreach.
- Strengthening of the role of RMCH in promoting public health at the grassroots level

Title of the Activity: Swachh Bharat Abhiyan – Cleanliness Drive and Awareness Campaign

Date & Venue:

•Date: 29.01.2024

•Venue: Community health Centre, Rithora Chandpur Bichpuri

Organized by:

Department of Community Medicine, Rohilkhand Medical College and Hospital NSS unit, Bareilly International university

Objectives:

- To promote awareness regarding cleanliness, hygiene, and sanitation among students, faculty, and the community.
- To instill a sense of responsibility towards maintaining a clean environment.
- To eliminate open defecation by constructing individual household toilets and public toilets.
- To improve solid waste management by encouraging cities to prepare detailed project reports.
- To promote behavioral change through education and community-led total sanitation approaches
- To increase awareness about sanitation and hygiene practices among citizens.
- To actively engage students and staff in cleaning activities as part of the national Swachh Bharat Abhiyan initiative.
- To educate the community on waste segregation, safe sanitation practices, and disease prevention linked to poor hygiene.

Description:

Importance of Cleanliness

Join us for an engaging workshop on the importance of cleanliness, where we'll explore the impact of cleanliness on our health, environment, and communities. Through interactive discussions and activities, participants will gain a deeper understanding of the benefits of cleanliness and learn practical strategies for maintaining cleanliness in their daily lives.

Key Takeaways:

- Understand the importance of cleanliness for public health and environmental sustainability
- Learn effective strategies for waste management and personal hygiene
- Discover ways to promote cleanliness in communities and workplaces
- Develop skills for sustaining cleanliness habits and promoting a culture of cleanliness

Who Should Attend:

- Community leaders
- Students
- Workplace professionals
- Anyone interested in promoting cleanliness and sustainability

Outcomes:

- Increased awareness of the importance of cleanliness
- Improved knowledge of cleanliness practices and strategies
- Enhanced skills for promoting cleanliness in communities and workplaces

Let's work together to promote a culture of cleanliness and create a healthier, more sustainable environment for all.

BAREILLY INTERNATIONAL UNIVERSITY

Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

The event was marked by enthusiastic participation and community interaction, encouraging a collective effort toward maintaining cleanliness and hygiene in daily life.

Outcomes:

- Significant Reduction in Open Defecation: India's open defecation rate decreased from 73% in 2000 to 11% in 2022 with 96.5% of rural households having toilets.
- Construction of Toilets: Over 90 million toilets were built between 2014 and 2019, with 10.9 crore individual household latrines constructed.
- Open Defecation-Free Villages: Over 603,175 villages were declared open defecation-free as of January 2020.

Activity Report

DATE- 13.02.2024

TITLE OF ACTIVITY: Free health check up and immunization status awareness

DATE AND VENUE

- **DATE**- 12.02.2024
- **VENUE**- Primary Health Centre, Rithora

ORGANIZED BY

Organized by the Department of Community Medicine, Rohilkhand Medical College and Hospital, Bareilly international university.

OBJECTIVES

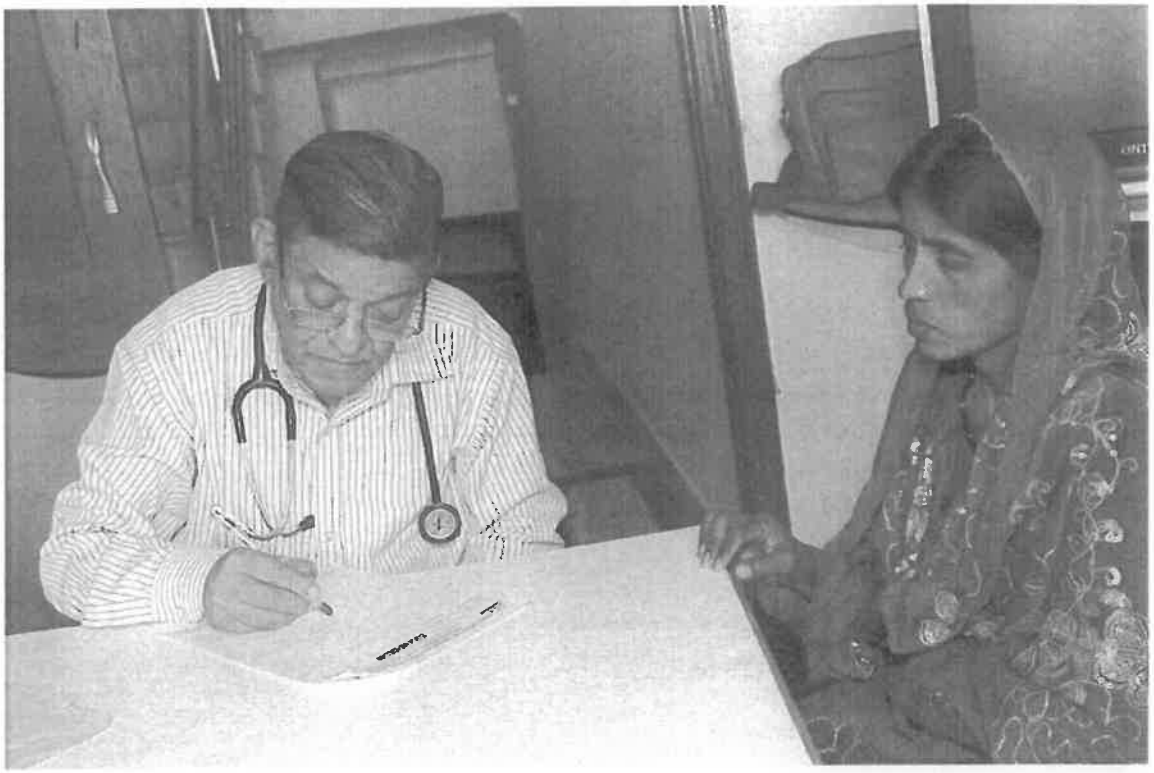

- **Enhancing Healthcare Access**: By organizing free health checkup camps, RMCH aims to provide medical services to underserved populations, ensuring that individuals who may not have access to regular healthcare facilities receive necessary medical attention.
- **Promoting Health Awareness**: These camps serve as platforms to educate the community about prevalent health issues, preventive measures, and the importance of regular health checkups, thereby fostering a culture of health awareness.
- **Early Detection of Health Conditions**: The camps facilitate the early identification of health conditions, enabling timely intervention and treatment, which can significantly improve health outcomes.
- **Community Engagement and Support**: Through these initiatives, RMCH engages with the local community, building trust and providing support to individuals in need of medical care.

RESOURCE PERSON(S)

1) Dr Arun singh **(Head of department Community Medicine)**
2) Dr Swati Khan
3) Dr Deepak Sharma

Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

DESCRIPTION

- The primary goal of these health checkup camps is to make healthcare accessible to all, especially to those who cannot afford or reach regular medical facilities. Through these camps, RMCH seeks to promote early diagnosis, raise awareness about common diseases, and encourage a preventive approach to health. The camps also aim to spread knowledge about hygiene, nutrition, and lifestyle diseases, which are becoming increasingly common in both rural and urban populations.

- **Services Provided-** During these free health camps, a wide range of services are provided. These include general health checkups, blood pressure and sugar level testing, eye checkups, dental screening, gynecological consultations, and pediatric care. In some cases, basic diagnostic tests are also carried out on-site. Patients who require specialized care are referred to RMCH for further treatment, often at subsidized rates or even free of cost in deserving cases.

- **Community Impact-** The impact of these camps has been far-reaching. Many individuals who were previously unaware of their health conditions have benefited through early diagnosis and timely medical intervention. In rural areas, these camps serve as the only point of contact with professional healthcare for many families. Additionally, they help reduce the burden on government health services by addressing minor health issues at the community level.

- These camps also serve as a practical training ground for RMCH's medical students and interns. Under the supervision of senior doctors and faculty, students engage with patients, conduct examinations, and gain invaluable field experience. This not only enhances their clinical skills but also instills in them a sense of responsibility toward society.

1. Early Detection of Diseases

One of the most important outcomes of these camps is the early diagnosis of various health issues such as diabetes, hypertension, anemia, malnutrition, eye problems, dental issues, and even potentially serious conditions like tuberculosis or cancer. Early detection enables timely treatment and better health outcomes.

2. Increased Health Awareness

These camps play a vital role in spreading awareness about personal hygiene, sanitation, lifestyle diseases, and nutrition. Many people attending the camps become more informed about maintaining their health, leading to healthier habits and a preventive approach to disease.

3. Improved Access to Healthcare

The camps bridge the gap between medical services and rural or low-income populations who otherwise may not be able to afford or access proper healthcare. Many people receive consultations, medications, and referrals free of cost, reducing financial barriers to treatment.

4. Strengthening Doctor-Patient Relationships

The free health checkups help build trust between the community and medical professionals. People feel more connected and confident in seeking help from RMCH, knowing they will be treated with care and

Email: info@biu.edu.in Website: www.biu.edu.in

5. Training and Exposure for Medical Students

For the students and interns of RMCH, these camps offer practical exposure to real-world healthcare challenges. They learn how to interact with patients from diverse backgrounds, improving both their clinical skills and their sense of social responsibility.

6. Community Empowerment

By engaging with the public and encouraging regular checkups, these camps promote self-responsibility for health. Families start understanding the importance of early care and are more likely to seek help in the future, reducing dependency on emergency care.

7. Follow-up and Referral Support

Many patients identified with serious conditions during these camps are referred to RMCH for further investigation or treatment, often at low or no cost. This follow-up care ensures continuity in treatment and a better chance at recovery.

TITLE OF ACTIVITY: Campaign for Zebra Crossing Usage and signal discipline

DATE AND VENUE

- **DATE**- 11.03.2024
- **VENUE**- Primary Health Centre, Rithora

ORGANIZED BY

Organized by the Department of Community Medicine, Rohilkhand Medical College and NSS Unit Bareilly International University

OBJECTIVES

1. To raise public awareness about the dangers and legal consequences of driving under the influence of alcohol.
2. To educate individuals, especially youth and drivers, about the impact of drunk driving on road safety and public health.
3. To promote responsible behaviour and encourage alternative options like designated drivers or ride services to promote for the road safety in the society .
4. To highlight real-life consequences through case studies, survivor stories, or statistical data to evoke emotional and rational understanding.
5. To advocate for stricter enforcement of DUI laws and community participation in preventing such incidents.

RESOURCE PERSON(S)

Email: info@biu.edu.in Website: www.biu.edu.in

DESCRIPTION

Raising Public Awareness

The primary objective is to educate the general public, especially youth and vehicle drivers, about the dangers of impaired driving. Through campaigns, workshops, and community events, the program spreads awareness about how even a small amount of alcohol can impair judgment and reaction time.

Promoting Responsible Behavior

The initiative encourages responsible choices such as using public transport, hiring cabs, or appointing a designated driver after consuming alcohol. Public participation and behavioral change are key goals.

Real-Life Impact and Education

By sharing stories from survivors, families of victims, and law enforcement personnel, the program delivers an emotional and realistic perspective on the consequences of drunk driving. Statistics and visual demonstrations reinforce the message.

Legal and Social Consequences

Participants are informed about the strict penalties for DUI offenses—fines, imprisonment, license suspension, and social stigma. The program also promotes community involvement to support preventive measures and ensure safer roads for all.

Activity Report

Date: 08.10.2024

Title of the Activity: Awareness Program on Environment and Tree Plantation

Date & Venue:

- **Date**: 07.10.2024
- **Venue:** Rithora Village

Organized by:

Department of Community Medicine, Rohilkhand Medical College and Hospital , NSS Unit Bareilly International university

Objectives:

- To create awareness about the environmental significance of sustainable tea plantation practices.
- To understand the relationship between agriculture, biodiversity, and ecological balance.
- To highlight the role of tea plantations in local economies, livelihoods, and environmental conservation.
- To encourage environmentally friendly practices in plantation areas, focusing on soil health, water use, and organic methods
- To reduce air pollution by absorbing carbon dioxide and and releasing oxygen .
- To provide areas for outdoor activities and relaxation .

Email: info@biu.edu.in Website: www.biu.edu.in

Description:

- The program focused on exploring the environmental and ecological aspects of tea plantations and their impact on local sustainability.
- It began with an introductory session on the history and significance of tea cultivation in India and its connection to rural livelihood .
- Participants were educated about eco-friendly farming methods, prevention of soil erosion, biodiversity conservation, and the use of organic fertilizers in tea plantations.
- Speakers emphasized the environmental challenges posed by conventional farming, such as chemical runoff and deforestation, and introduced sustainable solutions.
- A field demonstration or visual presentation (depending on venue) showcased proper plantation techniques and conservation practices. The event also covered the health aspects of plantation workers, including occupational health, safe pesticide handling, and access to sanitation.
- An interactive discussion allowed students and attendees to share their views on climate change, land use, and community involvement in protecting green spaces
- Community Involvement: The program involved active participation from local villagers, students, and faculty members, fostering a sense of shared responsibility for environmental conservation.
- Interactive Sessions: A dedicated Q&A session allowed attendees to clarify doubts, share their perspectives, and discuss innovative approaches to eco-friendly agriculture.

Email: info@biu.edu.in Website: www.biu.edu.in

Outcomes:

- Enhanced awareness of the environmental impacts and benefits of sustainable tea plantations.
- Promotion of eco-conscious farming among students and local participants.
- Integration of environmental health topics into academic and community outreach activities.
- Encouraged adoption of environmentally sound practices in plantation areas.
- Strengthened understanding of the link between environmental conservation, agriculture, and health.

Activity Report

Date: 13.11.2024

Title of the Activity: Voluntary Blood Donation Camp

Date & Venue:

- **Date:** 12.11.2024
- **Venue:** Rithora Village

Organized by:

Department of Community Medicine, in collaboration with the Department of Pathology and RMCH Blood Bank, NSS Unit Bareilly International University

Objectives:

- To encourage voluntary blood donation among students, staff, and the community.
- To raise awareness about the importance and safety of blood donation.
- To ensure a steady and safe supply of blood for emergency medical needs.
- To promote altruism and social responsibility among medical students and healthcare professionals.

Resource Person(s):

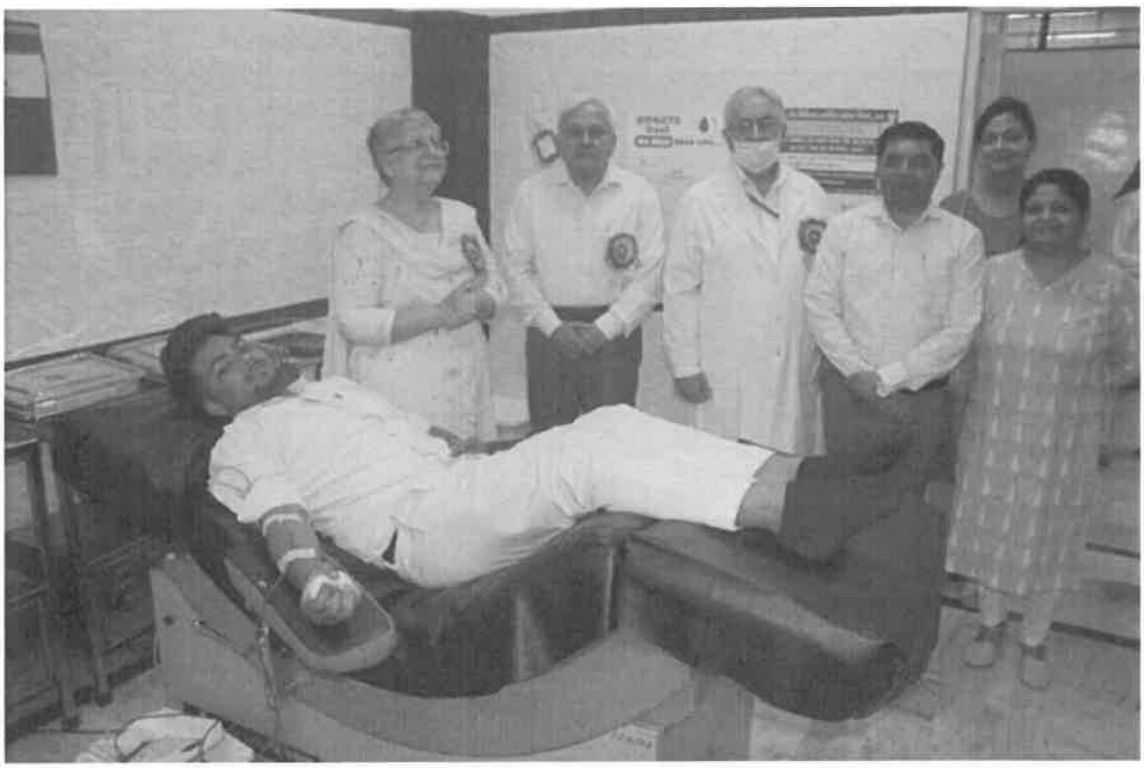

1. Dr. Rashmi Katyal **(Head of department Community Medicine)**
2. Dr. Medhavi Agarwal
3. Dr. Deepak Upadhyay

Email: info@biu.edu.in Website: www.biu.edu.in

Description:

- The Voluntary Blood Donation Camp was organized to support life-saving transfusion services and promote awareness about the importance of blood donation.
- The event began with a brief orientation session, addressing common myths and facts about blood donation, eligibility criteria, and its significance in saving lives. Students, faculty, and staff members from various departments came forward to donate blood voluntarily.
- Medical staff ensured that donation procedures followed all safety and hygiene protocols, including pre-donation health screening and post-donation refreshments and observation.
- Educational posters and banners were displayed to highlight the benefits of regular voluntary blood donation. A certificate of appreciation was provided to each donor as a token of gratitude.

Description:

Personal Hygiene Practices

Personal hygiene is essential for maintaining physical and mental well-being. Good hygiene practices help prevent the spread of illnesses, boost confidence, and promote overall health.

Key Practices:

1. Hand Hygiene: Wash hands frequently with soap and water, especially after using the restroom, before eating, and after blowing your nose, coughing or sneezing.
2. Bathing and Showering: Regularly bathe or shower to maintain personal cleanliness and freshness.
3. Oral Hygiene: Brush teeth at least twice a day and floss once a day to prevent tooth decay and gum disease.
4. Hair Care: Regularly wash and condition hair to maintain cleanliness and prevent oil buildup.
5. Nail Care: Keep fingernails and toenails clean and trimmed to prevent dirt accumulation and nail biting.
6. Foot Care: Wash feet daily and dry them thoroughly, especially between the toes, to prevent fungal infections.

Benefits:

1. Prevents Illnesses: Good hygiene practices help prevent the spread of infections and diseases.
2. Boosts Confidence: Personal hygiene can enhance self-esteem and confidence.
3. Promotes Health: Good hygiene practices contribute to overall physical and mental well-being.

By incorporating these practices into daily routines, individuals can maintain good personal hygiene and enjoy better health and well-being.

Activity Report

Date: 08.01.2025

Title of the Activity: Swachh Bharat Abhiyan – Cleanliness Drive and Awareness Campaign

Date & Venue:

•Date: 07.01.2025

•Venue: Community health Centre, Rithora Chandpur Bichpuri

Organized by:

Department of Community Medicine, Rohilkhand Medical College and Hospital NSS unit, Bareilly International university

Objectives:

- To promote awareness regarding cleanliness, hygiene, and sanitation among students, faculty, and the community.
- To instill a sense of responsibility towards maintaining a clean environment.
- To eliminate open defecation by constructing individual household toilets and public toilets.
- To improve solid waste management by encouraging cities to prepare detailed project reports.
- To promote behavioral change through education and community-led total sanitation approaches
- To increase awareness about sanitation and hygiene practices among citizens.
- To actively engage students and staff in cleaning activities as part of the national Swachh Bharat Abhiyan initiative.
- To educate the community on waste segregation, safe sanitation practices, and disease prevention linked to poor hygiene.

Description:

Importance of Cleanliness

Join us for an engaging workshop on the importance of cleanliness, where we'll explore the impact of cleanliness on our health, environment, and communities. Through interactive discussions and activities, participants will gain a deeper understanding of the benefits of cleanliness and learn practical strategies for maintaining cleanliness in their daily lives.

Key Takeaways:

- Understand the importance of cleanliness for public health and environmental sustainability
- Learn effective strategies for waste management and personal hygiene
- Discover ways to promote cleanliness in communities and workplaces
- Develop skills for sustaining cleanliness habits and promoting a culture of cleanliness

Who Should Attend:

- Community leaders
- Students
- Workplace professionals
- Anyone interested in promoting cleanliness and sustainability

Outcomes:

- Increased awareness of the importance of cleanliness
- Improved knowledge of cleanliness practices and strategies
- Enhanced skills for promoting cleanliness in communities and workplaces

Let's work together to promote a culture of cleanliness and create a healthier, more sustainable environment for all.

BAREILLY INTERNATIONAL UNIVERSITY

Phone: 0581-2526011-12, Fax: 0581 - 2303345
Email: info@biu.edu.in Website: www.biu.edu.in

The event was marked by enthusiastic participation and community interaction, encouraging a collective effort toward maintaining cleanliness and hygiene in daily life.

Outcomes:

- Significant Reduction in Open Defecation: India's open defecation rate decreased from 73% in 2000 to 11% in 2022 with 96.5% of rural households having toilets.
- Construction of Toilets: Over 90 million toilets were built between 2014 and 2019, with 10.9 crore individual household latrines constructed.
- Open Defecation-Free Villages: Over 603,175 villages were declared open defecation-free as of January 2020.

DATE- 30.01.2025

TITLE OF ACTIVITY: Free health check up and immunization status awareness

DATE AND VENUE

- **DATE-** 29.01.2025
- **VENUE-** Primary Health Centre, Rithora

ORGANIZED BY

Organized by the Department of Community Medicine, Rohilkhand Medical College and Hospital, Bareilly international university.

OBJECTIVES

- **Enhancing Healthcare Access**: By organizing free health checkup camps, RMCH aims to provide medical services to underserved populations, ensuring that individuals who may not have access to regular healthcare facilities receive necessary medical attention.
- **Promoting Health Awareness**: These camps serve as platforms to educate the community about prevalent health issues, preventive measures, and the importance of regular health checkups, thereby fostering a culture of health awareness.
- **Early Detection of Health Conditions**: The camps facilitate the early identification of health conditions, enabling timely intervention and treatment, which can significantly improve health outcomes.
- **Community Engagement and Support**: Through these initiatives, RMCH engages with the local community, building trust and providing support to individuals in need of medical care.

RESOURCE PERSON(S)

1) Dr Arun singh **(Head of department Community Medicine)**
2) Dr Swati Khan
3) Dr Deepak Sharma

BAREILLY INTERNATIONAL UNIVERSITY

Phone: 0581-2526011-12, Fax: 0581 - 2303345

Email: info@biu.edu.in Website: www.biu.edu.in

DESCRIPTION

- The primary goal of these health checkup camps is to make healthcare accessible to all, especially to those who cannot afford or reach regular medical facilities. Through these camps, RMCH seeks to promote early diagnosis, raise awareness about common diseases, and encourage a preventive approach to health. The camps also aim to spread knowledge about hygiene, nutrition, and lifestyle diseases, which are becoming increasingly common in both rural and urban populations.

- **Services Provided-** During these free health camps, a wide range of services are provided. These include general health checkups, blood pressure and sugar level testing, eye checkups, dental screening, gynecological consultations, and pediatric care. In some cases, basic diagnostic tests are also carried out on-site. Patients who require specialized care are referred to RMCH for further treatment, often at subsidized rates or even free of cost in deserving cases.

- **Community Impact-** The impact of these camps has been far-reaching. Many individuals who were previously unaware of their health conditions have benefited through early diagnosis and timely medical intervention. In rural areas, these camps serve as the only point of contact with professional healthcare for many families. Additionally, they help reduce the burden on government health services by addressing minor health issues at the community level.

- These camps also serve as a practical training ground for RMCH's medical students and interns. Under the supervision of senior doctors and faculty, students engage with patients, conduct examinations, and gain invaluable field experience. This not only enhances their clinical skills but also instills in them a sense of responsibility toward society.

1. Early Detection of Diseases

One of the most important outcomes of these camps is the early diagnosis of various health issues such as diabetes, hypertension, anemia, malnutrition, eye problems, dental issues, and even potentially serious conditions like tuberculosis or cancer. Early detection enables timely treatment and better health outcomes.

2. Increased Health Awareness

These camps play a vital role in spreading awareness about personal hygiene, sanitation, lifestyle diseases, and nutrition. Many people attending the camps become more informed about maintaining their health, leading to healthier habits and a preventive approach to disease.

3. Improved Access to Healthcare

The camps bridge the gap between medical services and rural or low-income populations who otherwise may not be able to afford or access proper healthcare. Many people receive consultations, medications, and referrals free of cost, reducing financial barriers to treatment.

4. Strengthening Doctor-Patient Relationships

The free health checkups help build trust between the community and medical professionals. People feel more connected and confident in seeking help from RMCH, knowing they will be treated with care and

Email: info@biu.edu.in Website: www.biu.edu.in

5. Training and Exposure for Medical Students

For the students and interns of RMCH, these camps offer practical exposure to real-world healthcare challenges. They learn how to interact with patients from diverse backgrounds, improving both their clinical skills and their sense of social responsibility.

6. Community Empowerment

By engaging with the public and encouraging regular checkups, these camps promote self-responsibility for health. Families start understanding the importance of early care and are more likely to seek help in the future, reducing dependency on emergency care.

7. Follow-up and Referral Support

Many patients identified with serious conditions during these camps are referred to RMCH for further investigation or treatment, often at low or no cost. This follow-up care ensures continuity in treatment and a better chance at recovery.

ORGANIZED BY

Organized by the Department of Community Medicine, Rohilkhand Medical College and NSS Unit Bareilly International University

OBJECTIVES

1. To raise public awareness about the dangers and legal consequences of driving under the influence of alcohol.
2. To educate individuals, especially youth and drivers, about the impact of drunk driving on road safety and public health.
3. To promote responsible behavior and encourage alternative options like designated drivers or ride services to promote for the road safety in the society .
4. To highlight real-life consequences through case studies, survivor stories, or statistical data to evoke emotional and rational understanding.
5. To advocate for stricter enforcement of DUI laws and community participation in preventing such incidents.

RESOURCE PERSON(S)

Email: info@biu.edu.in Website: www.biu.edu.in

DESCRIPTION

Raising Public Awareness

The primary objective is to educate the general public, especially youth and vehicle drivers, about the dangers of impaired driving. Through campaigns, workshops, and community events, the program spreads awareness about how even a small amount of alcohol can impair judgment and reaction time.

Promoting Responsible Behavior

The initiative encourages responsible choices such as using public transport, hiring cabs, or appointing a designated driver after consuming alcohol. Public participation and behavioral change are key goals.

Real-Life Impact and Education

By sharing stories from survivors, families of victims, and law enforcement personnel, the program delivers an emotional and realistic perspective on the consequences of drunk driving. Statistics and visual demonstrations reinforce the message.

Legal and Social Consequences

Participants are informed about the strict penalties for DUI offenses—fines, imprisonment, license suspension, and social stigma. The program also promotes community involvement to support preventive measures and ensure safer roads for all.

3– उक्त संदर्भ में मुझे यह कहने का निदेश हुआ है कि कृपया संबंधित संस्थाओं को इकाई आवंटन की सूचना प्रेषित करते हुए पंजीकरण हेतु निर्देशित करने का कष्ट करें।

4– विशेष शिविरों के आयोजन की सूचना शिविर प्रारम्भ होने की तिथि से 15 दिन पूर्व पंजीकृत डाक/स्पीड पोस्ट से शासन को प्रेषित नहीं करने की दशा में भविष्य में इकाइयों का आवंटन सम्भव नहीं होगा।

5– भारत सरकार के निर्देशानुसार सभी इकाइयों की गतिविधियों की मासिक रिपोर्टिंग ई–मेल के माध्यम से एन0एस0एस0 प्रकोष्ठ उ0प्र0 शासन व क्षेत्रीय निदेशक, राष्ट्रीय सेवा योजना को प्रेषित करना अनिवार्य है। नियमित रिपोर्टिंग न करने वाली इकाइयों को भविष्य में निरस्त कर दिया जायेगा।

6– इकाइयों की निरन्तरता बनाये रखने के लिए विशेष शिविर के आयोजन के 15 दिन के भीतर शिविर की कम से कम 21 पेज की रिपोर्ट कार्यक्रम समन्वयक को प्रेषित करना अनिवार्य है, जिसमें प्रत्येक दिवस की गतिविधियों पर 02 पृष्ठ (7×2)=14 पृष्ठ, प्रत्येक दिन की कम से कम 04 फोटो व

To Hon'ble for Major 21/12/23

22/12/2023

न्यूज पेपर कटिंग (चार फोटो प्रति पृष्ठ ×7) संलग्न होनी चाहिए एवं वर्ष भर किये गये नियमित कार्यक्रमों की भी रिपोर्ट (कम से कम 08 पृष्ठ की फोटो सहित)। रिपोर्ट की हार्ड कापी व साफ्ट कापी कार्यक्रम समन्वयक व शासन को प्रेषित करें।

7– वित्तीय वर्ष 2023–24 में भारत सरकार के निर्देशानुसार आवंटित छात्र संख्या के सापेक्ष धनराशि का भुगतान सेन्ट्रल नोडल एकाउन्ट (सी0एन0ए0) चालू खाता के माध्यम से ही किया जायेगा। अतः **उत्तर प्रदेश में राष्ट्रीय सेवा योजना से सम्बन्धित विश्वविद्यालयों एवं महाविद्यालयों का सेन्ट्रल नोडल एकाउन्ट (सी0एन0ए0) प्रणाली सब्सिडरी खाता (चालू खाता) शून्य धनराशि से भारतीय स्टेट बैंक में 01 सप्ताह के भीतर क्रियान्वित किया जाना है, तत्पश्चात अवमुक्त धनराशि व्यय किया जाना अवश्यक है, नहीं तो शासन स्तर से आवंटन निरस्त करने पर विचार किया जा सकता है।**

8– वर्तमान में राष्ट्रीय सेवा योजना की सभी इकाईयों को यह निर्देशित किया जाता है कि नियमित एवं विशेष शिविर का आयोजन तथा जनहित गारण्टी अधिनियम–2011 के अन्तर्गत ऑन–लाइन पंजीकरण एवं प्रमाण–पत्र निर्गत किया जाना सुनिश्चित करें।

भवदीय,

(कल्लू प्रसाद द्विवेदी)
विशेष सचिव।

संख्या–आवं0 52(1)/सत्तर–रा0से0यो0को0–2023, तद्दिनांक।

- ☐ क्या आप धूम्रपान करते है या तम्बाकू का सेवन करते है।
- ☐ दो सप्ताह से अधिक बुखार है।

तो आप कैम्प में आकर निःशुल्क सुविधा का लाभ उठायें, तथा अपने परिचितों को इस विषय में बतायें।

ROHILKHAND MEDICAL SUBSIDIZED HEALTH SCHEME (RMSHS)

ROHILKHAND MEDICAL COLLEGE & HOSPITAL

(A Constituent College of Bareilly International University)

1. Introduction

Rohilkhand Medical College & Hospital (RMCH) has been a beacon of healthcare and medical education for Bareilly and the surrounding regions. Since more than 20 years RMCH believes that equitable access to healthcare is a fundamental right for all individuals. The commitment to serve not just the student and faculty body, but also the larger community, has led to the formulation of the **Rohilkhand Medical Subsidized Health Scheme (RMSHS).**

The RMSHS is a strategic institutional policy that ensures comprehensive and affordable healthcare delivery to a wide spectrum of beneficiaries. These include RMCH's internal members—faculty, staff, students, and their dependents—and external populations from surrounding rural and urban areas. The policy is structured to integrate hospital-based, field-based, and outreach-based services through the institution's primary healthcare arms: the **Rural Health Training Centre (RHTC)** and the **Urban Health Training Centre (UHTC).**

The vision of RMSHS is two-fold: first, to strengthen institutional healthcare access; and second, to contribute to public health through subsidized diagnostics, medications, consultations, and health education. With this scheme, RMCH actively bridges the gap between tertiary medical excellence and grassroots healthcare needs.

2. Objectives of the Subsidized Health Scheme

The RMSHS has been crafted with a series of strategic objectives in mind, designed to support institutional responsibility, patient equity, and sustainable public health outcomes. The core objectives are:

1. **To provide quality healthcare at minimal or no cost** to members of the RMCH community, including faculty, residents, students, and staff.
2. **To extend subsidized diagnostic, consultation, and procedural services** to economically weaker sections of society.
3. **To operationalize community-based healthcare** through Rural and Urban Health Centers.
4. **To promote preventive health practices** via structured education and awareness activities.
5. **To reduce the financial burden** on patients by capping costs and offering predefined discounts.
6. **To institutionalize a culture of social medicine**, integrating the medical college's academic functions with community health promotion.

7. **To document and evaluate the impact** of subsidized healthcare on both institutional and public health metrics over time.

3. Scope of Beneficiaries

The scope of RMSHS beneficiaries is broad, ensuring inclusion of various categories of internal and external individuals:

A. Internal Beneficiaries

- **Faculty members** (Medical, Dental, Nursing)
- **Students** (Undergraduate and Postgraduate in Medical, Dental, Paramedical, and Nursing streams)
- **PG Residents** in clinical and non-clinical departments
- **Non-teaching and support staff** of the university and hospital
- **Dependent family members** of faculty and employees (spouse, children, and dependent parents)

B. External Beneficiaries

- Residents of surrounding **rural areas** catered to by RHTC
- Residents of **urban slum and low-income areas** connected through UHTC
- **Patients visiting periodic multispecialty health camps** organized by RMCH
- Members of the public participating in health education and outreach programs

By combining internal institutional healthcare with community-level interventions, RMSHS transforms the campus into a health hub for both enrolled members and local citizens.

4. Services Offered Under RMSHS

The scheme extends across all major health service categories, including inpatient, outpatient, diagnostic, pharmaceutical, preventive, rehabilitative, and primitive services. Key inclusions are:

1. **Free and discounted OPD consultations** in RMCH and affiliated outreach centers.
2. **Concessional room charges** for internal stakeholders admitted as indoor patients.
3. **Subsidies on investigations**, including radiology, pathology, biochemistry, and microbiology.
4. **Discounted or free medicines**, based on eligibility and availability.

5. **Health camps** with free screenings, free consultations, and low-cost diagnostics.
6. **Preventive and curative maternal and child health services** through RHTC and UHTC.
7. **Wellness and screening programs** including blood pressure, blood sugar, BMI, and TB surveillance.
8. **Dental consultation services** at community centers.
9. **Access to minor surgeries and wound care** in field locations.
10. **Family welfare and reproductive health education**, especially targeted toward rural women.

5. Inpatient Room Charges – Policy Details

Private Room Charges

Beneficiary Type	Room Type	Policy Description
Faculty (Medical, Dental, Nursing)	Private Room	No room rent charges
Students (Medical, Dental, Paramedical, Nursing)	Private Room	No room rent charges
PG Residents (Medical and Dental)	Private Room	No room rent, for A.C. room differential to be paid
Other Employees (teaching/support)	Private Room	Discounts are provided on a case to case basis on room rent

The aim is to support faculty and student recovery during illness without economic burden, while encouraging responsible use by requiring A.C. upgrade on cost-sharing basis.

6. Intensive Care Unit (ICU) and Emergency Services Policy

Discounts and subsidized rates are available to cater to the patient population, majority of whom come from a rural and low socio-economic backgrounds.

7. Diagnostic and Imaging Investigations

To support timely diagnosis and affordable disease detection, RMCH offers the following:

Laboratory Services:

- Investigation charges are reduced by more than 50% in camps which are held regularly at our hospital. All patients benefit by these camps by availing high standard facilities at subsidized rates for:
    - Local Community
    - Employees
    - Students
    - Faculty

Radiological Imaging:

- **Huge Discounts** on all radiological investigations are provided to patients for the benefit of society. RMCH caters to huge rural areas and maximum population is poor and needs health care services. This is met out by 'subsidized rates for all' hospital policy of our institute.

8. Indoor Patient Procedures

- Indoor patient cases are eligible for **FOC or maximum discounts** on radiological diagnostics and pathology, nursing and ICU/NICU services along with procedural charges.

9. Multispecialty Health Camps (Regular)

Key Features:

- **Free consultations** from specialists across departments
- **Subsidized lab tests**, X-rays, and ECGs
- **Free or low-cost medicine distribution**
- Focus on seasonal illnesses, occupational hazards, gynecological problems, chronic diseases
- Camps conducted in schools, panchayat halls, urban slums, etc.
- Referral and follow-up tracking for serious cases

Each camp is backed by a core medical team, logistics crew, pharmacy unit, and data support staff.

11. Rural Health Training Centre (RHTC) Services

RHTC provides essential medical services to undeserved communities, improving access to basic healthcare and treatments, serving as a primary point of contact for medical assistance in remote areas.

10.1 Out-Patient Services

- Daily free consultations for fever, infections, minor trauma
- Referral system in place for serious or surgical cases

10.2 Maternal and Child Health

- ANC/PNC checkups
- Distribution of IFA tablets, TT injections
- Screening for pregnancy complications

10.3 Pediatric and Neonatal Health

- Nutritional assessment and immunizations
- Growth monitoring and developmental tracking

10.4 Adolescent Health

- Sessions on menstrual hygiene, nutrition, and de-addiction
- Screening for anemia and vision

10.5 Basic Laboratory Services

10.6 Community Outreach Programs

- House visits, health mapping, health cards for families

10.7 Dental Care Services

- Free consultations by dental faculties.
- Oral hygiene awareness drives in rural communities.

11. Urban Health Training Centre (UHTC) Services

11.1 Out Patient Services

11.2 Maternal & Child Health

- Functional labor room and minor OT
- Growth chart monitoring and MMR reduction strategy

11.3 Disease Screening Programs/Camps

- Monthly camps for diabetes, TB, hypertension
- Surveillance of communicable diseases and outbreak control

11.4 Environmental Health

- Fogging, water testing, solid waste awareness

12. Distribution of Free Medicines and Nutritional Supplements

- Iron, Folic Acid, Calcium, and Protein Supplements
- Deworming tablets
- Multivitamins

These supplies are distributed free of cost through dedicated distribution counters.

13. Administrative and Monitoring Mechanism

Designation	Responsibility
Medical Superintendent	Overall scheme supervision and quality control
Deputy MS	Beneficiary handling, documentation, dispute redressal
HODs	Recommending discretionary FOC/discount cases
Section/Unit I/C	Day-to-day camp and field management
Community Social Workers	Mobilization, health education, and case tracking

Monthly review meetings and annual audit reports ensure transparency.

14. Grievance Redressal and Feedback

- Patient feedback is taken from all OPD/IPD patients including relatives of patients
- Feedbacks are kept anonymous and analyzed for improvement and policy making
- Grievances resolved within 48–72 hours

15. Financial Sustainability

Our institute is a self-sustained establishment, with all finances managed by management and administration. No donations are taken from any external sources. However integration with government health schemes eg. Ayushman Bharat, TPA are available.

फाइलेरिया से बचाव के लिए जरूर खाएं दवा

रोहिलखंड मेडिकल कॉलेज में फाइलेरिया उन्मूलन अभियान के तहत शिविर लगा

कार्यालय संवाददाता, बरेली

अमृत विचार : रोहिलखंड मेडिकल कॉलेज में शनिवार को फाइलेरिया उन्मूलन अभियान के तहत शिविर आयोजित किया गया। जिसकी शुरुआत करते हुए मुख्य अतिथि बरेली इंटरनेशनल यूनिवर्सिटी की कुलपति डॉ. लता अग्रवाल ने बताया कि क्यूलेक्स मच्छर के काटने से फाइलेरिया होता है। इस बीमारी के लक्षण 5 से 15 साल में दिखाई देने हैं। ऐसे में हर कोई खुद को फाइलेरिया ग्रसित मानकर दवा का सेवन करें और खुद के साथ ही आने वाली पीढ़ी को भी इससे सुरक्षित बनाएं। यह दवा पूरी तरह सुरक्षित है, इसलिए लक्षण आने का इंतजार न करके दवा का सेवन करना ही समाज हित में है।

रोहिलखंड मेडिकल कॉलेज में फाइलेरिया उन्मूलन कार्यक्रम में बोलती डॉ. लता अग्रवाल।

मेडिकल कॉलेज के प्रधानाचार्य डॉ. दिग्विजय ने बताया कि फाइलेरिया से बचाव के लिए मेडिकल कॉलेज के विद्यार्थियों की ओर से भी स्वास्थ्य विभाग का सहयोग किया जा रहा है। शिविर में 50 से अधिक लोगों को फाइलेरियारोधी दवाई खिलाई गई। डॉ. रश्मि कटयाल, डॉ. राकेश गुप्ता, डॉ. शालिनी चंद्रा, डॉ. दीपक उपाध्याय, स्वास्थ्य विभाग से डॉ. भानु प्रताप, पथ संस्था के डॉ. नितिन गोपी आदि मौजूद रहे।
