4.2.2

Describe the adequacy of both outpatients and inpatients in the teaching hospital during the last five years vis-à-vis the number of students trained and programmes offered (based on HIMS / EMR) within 500 words.

Response:

Bareilly International University: Comprehensive Educational and Clinical Services

Bareilly International University (BIU) offers a wide range of educational programs across its constituent colleges, training over 3,000 students each year. The university's hospitals are equipped with advanced diagnostic and therapeutic services, ensuring effective healthcare delivery to the community.

Outpatient Services

The outpatient department (OPD) operates daily from 9:00 AM to 5:00 PM, featuring dedicated consultation rooms for faculty and spaces for clinical learning. A highly qualified team of doctors provides patient care at affordable rates, with an average of 2,070 patients visiting the OPD daily. Students gain invaluable experience in patient management through direct interaction, and specialty OPDs allow deeper insights into specific medical conditions.

Inpatient Facilities

The hospital houses 1,450 inpatient beds, offering comprehensive specialty and superspecialty services for both outpatient and inpatient care. Bedside teaching and interactive sessions take place in various demonstration rooms adjacent to the wards, enabling students to develop clinical and communication skills under the guidance of experienced faculty. Postgraduate students play an active role in managing ward patients, enhancing their clinical expertise and professionalism.

The hospital features advanced surgical suites capable of performing both minor and complex surgeries. Intensive care units (ICUs), including ICCU, Surgical ICU, PICU, and NICU, provide a total of 200 beds for critically ill patients. These units are equipped with multi-parameter monitors, ventilators, defibrillators, and dialysis facilities, offering essential hands-on training for undergraduate and postgraduate students in the management of critically ill patients.

Nursing Education

Clinical experience is fundamental to nursing education at BIU. Nursing students rotate through various inpatient and outpatient departments, where they assess patients, perform clinical procedures, and assist in preventive, diagnostic, and therapeutic activities. This rotation, under faculty supervision, not only develops clinical competence but also imparts knowledge on health and nursing service organization, quality assurance, and workforce management.

Physiotherapy and Occupational Therapy

Both outpatient and inpatient physiotherapy and occupational therapy services are available. Undergraduate and postgraduate students in these fields are posted across different departments to learn various rehabilitative measures. Experienced faculty from the Physiotherapy and Occupational Therapy colleges, along with specialists from other departments, provide hands-on training that emphasizes early detection, disability prevention, and management of various disorders.

Patient Statistics and Technology Integration

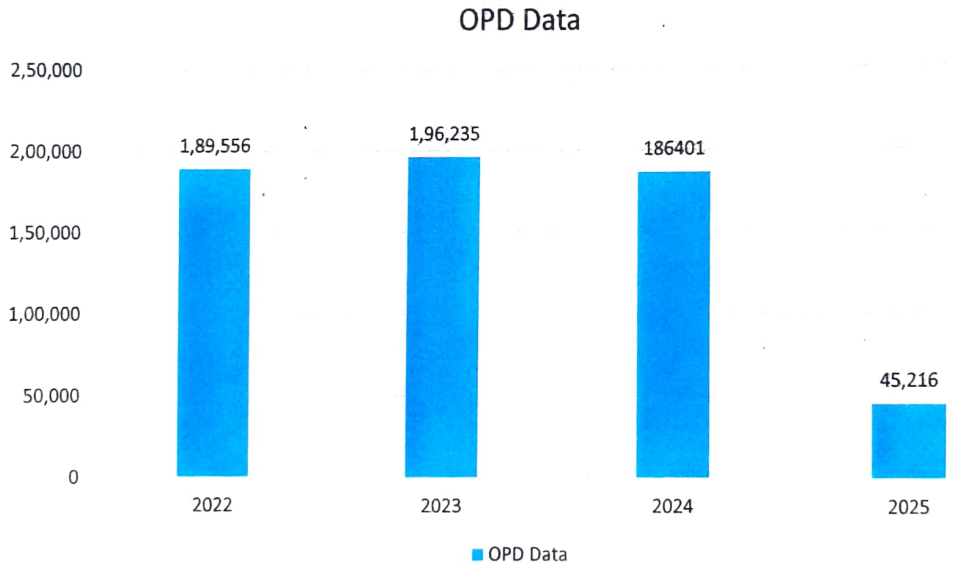

Over the past five years, the hospital has served approximately 700,000 to 800,000 outpatient visits annually, while 90,000 to 95,000 patients are admitted each year. This significant patient volume underscores the hospital's vital role in the community.

The university and hospital utilize advanced Hospital Information Management Software for efficient governance. Additionally, Microsoft NAV 2016 ERP software aids in planning, development, administration, and monitoring of hospital operations and constituent colleges.

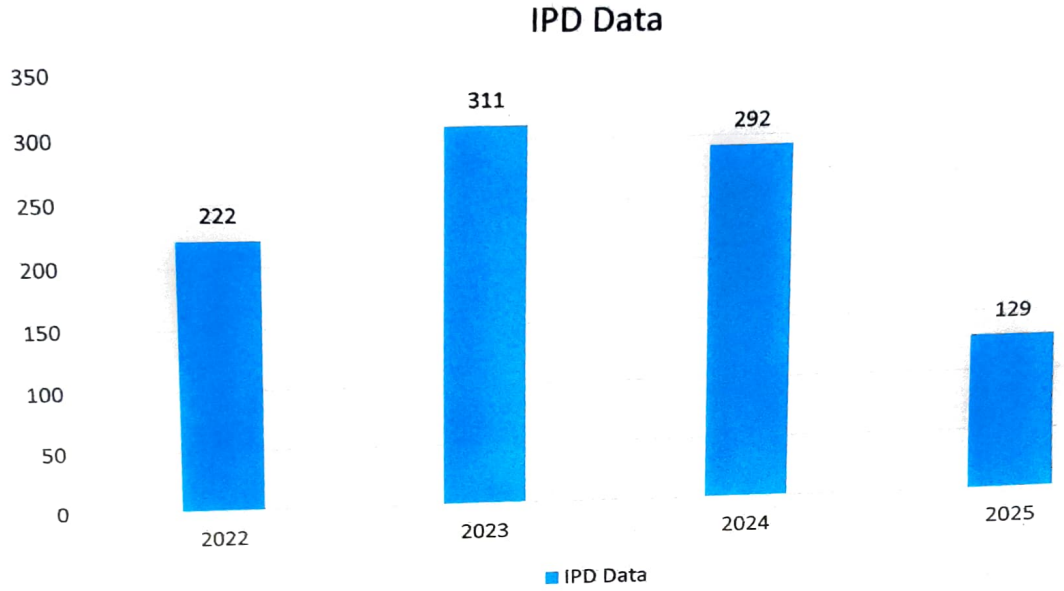

Through these comprehensive services, Bareilly International University not only ensures quality education for its students but also significantly contributes to the health and well-being of the community.

The adequacy of both outpatients and inpatients in the teaching hospital vis–a–vis the number of students trained and programmes offered.

Clinical material	2022	2023	2024	2025
OPD	189556	196235	186401	45,216
