To,

The Chancellor
Bareilly International University
Bareilly

Sir,

We feel immensely pleased for the opportunity given to us to present ourselves for the development of University ERP software (UERP).

Attached with are 1st Copy of some suggested key points for the software (UERP)

Any other requirements can be discussed amicably with will be incorporated into with our suggested points in the same cost.

Looking forward to serving your prestigious organization.

For Nuix Technologies Pvt. Ltd.

SIS (Student Information System)

Student information systems (SIS) store and track all student information, including grades, attendance records, and more. The software functions as a digital drop box for school-related information. SIS software has become a vital tool for both educational institutions as well as parents and students, who use it to gain access to student information, make payments, and communicate with school functionaries.

SIS are used by teachers, students, and parents to access all relevant information pertaining to a student's schooling. SIS software is leveraged for a few different functions; the main two being as a channel of communication and as a place to store student information.

SIS Benefits / Features:

There are a variety of benefits associated with our student information systems for parents and students as well as educational institutions and their staff. We provide channels for communication between school officials and students, act as a singular source of student-related information, streamline billing processes, and more. Some key features of our SIS are...

Information management — This is the primary feature of the our software; an SIS houses everything from medical records to addresses.

Reporting — This feature allows users to manipulate the information housed in the solution and generate reports.

Admissions management — This feature manages the entire admissions process in your SIS, from application to tours to acceptance and tuition payment.

Billing and payment — We provide student billing functionality through the application as well as allow them to pay their bills via the system.

Student information management — With our SIS, teachers and administrators can manage all student-related information, including medical history, emergency contacts, attendance, and grades.

Student portal — Students use the portals to track their own performance, including attendance and grades. The portal also acts as an open channel of communication, which students can use to communicate with their teachers.

Parent portal — Our SIS includes parent portals, which parents can use to track their kids progress, attendance, and behaviour. Parents can also use the portal to maintain communication with the administration as well as with their children's teachers.

Registration and scheduling — Our SIS has course registration and scheduling features built in, so students can sign up for courses via the application.

Gradebooks— Teachers can keep a comprehensive gradebook for all their students and manage all grade-related activity.

Easy scheduling of examinations — Scheduling of examination dates can be easily handled by our SIS. It correlates all details such as availability of teachers and completion of book syllabus fixed for the term before announcing the examination dates. Details about records of all written examinations, appraisals on the papers, marks or grades offered, and educational headway made by the students can be recorded for easy retrieval.

LMS (Learning Management System)

Online Course Material : Learning management systems (LMSs) are platforms designed to help instructors manage educational coursework online. They provide educators with a single platform for making course material accessible online, including lesson content, assignments, and assessments. LMSs are used to help streamline the delivery of online learning for educational institutions, allowing for a more connected and accessible educational experience for students.

An LMS enables instructors to build digital courses that include various types of content, such as syllabi, lectures, multimedia files, and readings, as well as distribute assignments to students.

Online assessment functionality, such as quizzes and tests. Communication features enable instructors to communicate with students and parents via direct messages, mobile notifications, and discussion forums.

Some key features of LMS:

- Provide a platform for educators to deliver online course content to students.
- Distribute assignments to students and allow instructors to grade student work.
- Administer digital assessments to students.
- Facilitate individualized feedback on student work, such as through written comments or grading rubrics.
- Generate performance dashboards for tracking student progress.
- Contain gradebook functionality.
- Webinar Integration.

Library Management System

- Purchases, Accessioning and payment of books
- Unique serial number identification through RFID library
- Unique serial number serial identification of books
- Barcode
- Stock verification
- Circulation
- Reservation and claims
- Catalogue
- Overdue and recall notices
- Clearance and fine
- Notices and reminders
- Book bank

Controller of Examination System

- Hall Tickets
- Exam Scheduling
- Attendance
- Re-valuation
- Proctored online examination.

University ERP Development **Ver: 1.0**	
Project Name	**eLearnGateWay**
Time required for development and deployment	**9 – 10 months**
Mode of development	**Module wise Priority as decided by Management**
Cloud uses charges (AWS / Azure)	**Billed directly to customer (Cost as per Usage)**
Licence's structure	**Unlimited students' enrolment for 1st Three years**
Cost for the project	**14 Lacs + Applicable taxes (18%)**
Support	**6 Months From Go Live**
AMC	**25% + Applicable Taxes (18%)**
Payment Terms	1. 25 % along with the order 2. 20 % after 90 days from order date 3. 20 % after 180 days from order date 4. 20 % after 270 days from order date 5. 15 % on go live
